

About Zim Bonds and Redemption

International Public Notice

August 16, 2025

The United States of America —
Federation of States

Zim Bonds in their several iterations and kinds have been issued by successive

Zimbabwean Governments that have appeared and disappeared largely as a result of Musical Chairs Regime Changes.

The so-called Intelligence Agencies of western enclaves have staged repeated coups against the individuals elected in Zimbabwe and their closest advisors and military officials, with the goal of these regime changes centering around economic rather than political issues.

Zimbabwe is greatly blessed by vast deposits of strategic minerals.

Zim Bonds have been issued and "securitized" against the value of these minerals to western industries, including defense contractors.

As the minerals have become more valuable in the marketplace, the Zim Bonds have increased in value accordingly. It is this increase in value that has funneled all the snookery and intrigue surrounding these bonds, which should, logically be resulting in development funds for Zimbabwe and vastly improved economic conditions for the Zimbabwean people — and aren't.

Instead, we have a Three-way Three-way Grand Swindle going on.

The first victims are the Zimbabwean people who have endured regime change after regime change and deals made without their consent regarding the mineral wealth of their country and its extraction and development. Rapacious developers from all corners of the world including the U.S., Europe, and China have had their fingers in the pie and their agencies, including mercenary forces on the ground, have created misery and havoc and environmental destruction in a once peaceful and pastoral country has been recklessly decimated and the people themselves reduced to scabbling for food, fuel, and shelter while riots engulf the capitol and bullets fly in the night. food, fuel, and shelter while riots engulf the capitol and bullets fly in the night.

This has been going on for more than twenty years and still the nations of the Earth sit silent as tombs and all the grand institutions that say they are established in pursuit of justice and peace, are either corrupted or left without the funding and boots on the ground to do anything about this colonialist corporate looting.

The second targeted victims are the investors in Zim Bonds, who hope to "make a killing" on the increased value of these bonds, but who are then being subjected to gross monopoly inducement in their own turn. In The United States, Zim investors are being told that they have to go to special pre-arranged redemption centers, where they are instructed to sign Non-Disclosure Agreements and suggest public benefit projects they wish to pursue, and if these projects are approved, they may retain up to 20% of the exchange value of their bonds. The 80-90% left goes to unidentified brokers - turn out to be the same mercenary "U.S. Army" elements that have been part of the problem in this country since 1863.

Thus the American Zim Bond investors are being defrauded out of 80-90% of the exchange value and

being used as a money laundering agent for the British exchange value and being used as a money laundering agent for the British Territorial Mercenary Force misrepresenting itself as the U.S. Mercenary Force misrepresenting itself as the U.S. Army.

Last, because this is a Three-way Swindle, we see that no matter what else happens upon the “redemption” of these bonds, everyone loses to the banks.

Hyperinflation is the ultimate result of unleashing vast amounts of credit-based fiat “dollars” into the world economy, even if those currencies are ultimately backed by even actual Zimbabwean resources.

The “lucky ones” will be paying \$10,000 for a loaf of bread, while the “unlucky ones” will starve to death in this scenario, so just beyond the seeming promise of riches beyond telling — purloined riches taken from Zimbabwean farmers and tradesmen — comes the hollow truth and the destruction of whatever currency the bonds are redeemed in.

This hyperinflation and devaluation of the currencies involved — Federal Reserve Notes, United States Dollars, and EUROS — benefits the banks and incorporated “governments” at the expense of everyone else, as it provides a smokescreen for them” and an excuse to pay out a fraction of pennies on a dollar printed by these institutions.

In economic systems there is always a push behind a pull, a cause and a reaction, a credit and a debit. The only ultimate way to capture wealth and hold it, is through organic growth and the addition of value to services and products, and secondarily then, value added to the raw commodities that these services and products depend upon.

There is no way to cheat an actual economy. The Truth always wins, but at the cost of those who are left standing when the music ends.

The smokescreen provided by the generalized hyperinflation caused by these bond sales and sales and redemption activities hides the fact that the banks and underwriters redemption activities hides the fact that the banks and underwriters were passing off worthless currency to begin with.

It also neatly hides their ultimate plan for depopulation. They can stand on the sidelines and bemoan the poverty, the pollution, the bread lines, the disease.... having caused it all with malice aforethought.

They can point to the Zimbabwean Bonds Scandal the same way they pointed to the Bottomry Bonds Scandal three hundred years ago, as the “cause” of the economic collapse, when the economic collapse was guaranteed as a result of their own fraud which started —not in 1913— but generations before that.

The only question is: are we going to let them get away with this again?

Or are we going to pull the central banks and their monopoly interests out of our living guts like so many tapeworms and make an end to them?

As things stand, there is sufficient evidence of meddling in Zimbabwe by U.S. Incorporated and European colonialist powers and China, also, to justify outlawing Zim Bonds as part of an Unjust Enrichment Scheme.

This would render the Zim Bonds issued to date as valueless and cause a great deal of consternation among the same people that this action would ultimately save.

While dreams of swimming pools and fancy cars cloud their minds and other more worthy dreams of serving people in need and saving the Earth from pollution swirl through the imaginations of Zim holders, the actual planned end to all of this is death for millions of people.

That is how the theft of Zimbabwe’s resources plays out in the fraud against the investors, and how everyone stands to lose to the banks and the so-called “incorporated” governments, if the Zim Bond Redemption is allowed.

What is a smokescreen for them, is death and destruction for everyone else.

We are, therefore, calling upon the nations of the world to take notice and where possible, to take action in immediate self-defense.

Steps can be taken to assist the Zimbabwean people, the actual owners of these exploited resources, and steps can also be taken to cushion the loss to investors, but nobody can afford the inevitable destruction which follows - ironically- upon "redemption".

These activities also deserve to be outlawed and deemed illegal as Money Laundering and Coerced Monopoly Inducement in the case of The United States and United States and American Investors who were heavily targeted and who stand to be defrauded by the same British Territorial Mercenary Forces that have disguised themselves as our own Armed Forces and shamed our uniforms and borrowed flags for six generations.

We are doing what we can as a lawful government to offer people reasonable true exchange rates through our banks and and we are standing ready to see what action may be taken or suggested as a group response to put an end to continued colonialism operating under the guise of "military protectorates", commercial interests, and territorial government.
