

An End to an Unlawful Court System

International Public Notice

August 17, 2025

The United States of America —
Federation of States

Most people cannot imagine that there could be such a thing as an unlawful court system, nor could most Americans fathom it being firmly established in our country — yet it has been, for 160 years as of this past May.

Understanding this requires knowing certain facts.

Maritime Commercial Law is a branch of Roman Civil Law perfected by Scottish Barristers who are also experts in Admiralty Law.

It was a Scottish Barrister, Lord Mansfield, who created the bastardized form of law known as “Equity Law” or “King’s Bench Law” by combining elements of English Common Law and British Admiralty Law and Scottish Maritime Law — just picking and choosing — and rolling it all up into a new scheme of “law” that is, as our American Forefathers called it, “neither fish nor fowl”.

Others, like Edmund Burke, argued that this new system of law took the worst elements of all the others and combined them, on purpose, to create a court of “arbitrary discretion and corruption” — serving one purpose: to make money for the King and the Barristers, who got a share of whatever they can chisel out of the defendants.

The foundational theory of Equity Law is that the King owns everything and is always the primary interest equity holder; given this premise, no matter what the subject matter or rightful jurisdiction, anything brought before an Equity Court must either yield a finding in the King’s favor or result in dismissal of the charges altogether.

So, given all that, it should not surprise us that in 96% of all cases brought before before such an Equity Court, the judges use their “plenary discretion” to find in favor of the King (and themselves, of course, because they get a share of the loot), and few if any wins for the defendants are ever reported, because the majority of any “dangerous suits” are dismissed before any honest engagement can take place.

These so-called “dangerous suits” are not dangerous in the sense of being potentially destructive in and of themselves, but within the twisted culture of these courts, the danger is most often one of disclosure. Whenever a defendant comes close to exposing the true nature of the court, its lack of authority, or the basic conflict of interest that the court functions under, the judge is relied upon to use his “discretion” to dismiss the case and so defuse any possibility of discovery, prosecution, or public outcry.

So now that you know how “Equity Courts” work and whose purported equity is being enforced in them, you are in a better position to understand some salient parts of American History that you are most likely unaware of.

In May of 1865, barely a month after General Lee surrendered the Army of Northern Virginia, the British Territorial U.S. Congress that Abraham Lincoln engineered and put into position to oversee the conduct of this infamous mercenary conflict, created ten (10) Military Districts covering eleven Southern States, each one presided over by a Union General of at least Brigadier rank, who was responsible for staffing new Military District Courts.

The form of law that these new “District Courts” practiced was Equity Law.

These courts became known as “Carpetbagger Courts” — a reference to the fact that they were staffed by Northerners who arrived carrying luggage made out of thick tapestry materials resembling cheap carpet, and who were infamously corrupt, arbitrary, unjust, and predatory toward anyone accused of anything.

To hide the fact that these were (and are) foreign courts and also courts imposed by a purported Army of Occupation, the word “Military” was dropped from “Military Districts” and from then on, they were presented to the American Public as “Judicial Districts” — which made it sound like these courts were operating in a civilian and known capacity, when in fact they never were.

And still aren’t.

Equity Law is still a profoundly foreign form of law never accepted or authorized for use within the borders of any State of the Union.

What then, are these “District Courts” still doing here, operating throughout our country, 160 years after this Mercenary Conflict misidentified as a “Civil War” ended?

Answer: they are raising revenue for the British King and the Popes, while illegally occupying our country and using our own sons and daughters to serve as their mercenaries and subject us to their foreign laws.

The unlawful and illegal nature of their actions speak for themselves, especially when you learn that our actual States never participated in anything called “the American Civil War” and are still owed “good faith service” from these same Principals and their governmental services vendors.

We are calling upon the High Courts and other nations to help us put an end to this travesty and the criminal Gross Breach of Trust and violation of service contracts underlying it.

We are referring this as a criminal information report to the Uniform Commercial Court judges responsible and to the Ecclesiastical Courts that are even more responsible for this gross lack of oversight to shut down all Federal Judicial District Courts operating outside the District of Columbia, to arrest the Judges who have participated in this mockery of justice, to void all decisions made by these District Courts, and to order restitution to the victims, be they States or living people.

We are enforcing our Constitutional guarantees and the limitations of these service contracts and are demanding: (1) immediate removal of Federal “Judicial District” Courts from our land and soil; (2) the arrest of any hired Federal Judge serving these Judicial District Courts who does not immediately decamp to the District of Columbia; (3) the prosecution of any United States Attorneys who do not immediately decamp to the District of Columbia; (4) the removal of all “District” Attorneys serving these courts and their arrest and deportation to the District of Columbia if necessary; (5) the removal of all affiliated federal franchise courts operating as state-of-state courts and State Trust Courts, for example, the State of Alabama Superior Court and Michigan State Court; (6) the immediate recognition of

American Common Law as the law the people of this country are owed; (7) the immediate recognition of our Justices of the Peace; (8) the immediate recognition of our elected County Sheriffs who are elected by unincorporated local County Assemblies; (9) the immediate recognition of our Continental Marshals, who are the land jurisdiction equivalents of U.S. Marshalls; (10) the immediate recognition of our well-regulated and peaceable State Assembly Militias; (11) the immediate return of authorities and infrastructure and personnel currently serving as State (Trust) National Guards to the command of our unincorporated State Militias and our Militia Commanders; (12) the immediate return of our courthouses, jails, and penitentiaries that have been paid for with our money; (13) the immediate recognition of our Peacekeeping Task Force, and peaceable cooperation with it, to help build integrated community resource networks, effective disaster preparedness programs, and a better, more reliable and more practical safety net for all Americans.

We are aware that we have valuable and necessary District personnel operating legitimately within the borders of our States and we are not suggesting that District employees in general are subject to removal and replacement.

What we are saying is that these Judicial Districts have been set up under False Pretenses and have consistently and purposefully misidentified and misaddressed average Americans and subjected them to foreign law as part of a disguised criminal racketeering scheme; these District Courts and affiliated state franchise courts have been operating in an unlawful and ultimately, illegal fashion, in gross conflict of interest and for purposes of the unjust enrichment of foreign interests throughout their careers.

They need to leave and withdraw to their proper domicile within the District of Columbia without delay; a fraud of 160 years is the same as the fraud of a single day and is owed the same result.
