

# Banking Progress

## International Public Notice

April 19, 2025  
The United States of America —  
Federation of States

The GFG Banks and the state-of-the-art transaction and exchange platforms that allow transactions in real time are American. So are the satellites and servers and the unique base algorithms that drive the entire system. This Bilateral Bank System (BBS) has been under construction since 2007. It is funded by Americans and run by Americans and the entire system is designed to be used and enjoyed by living people here and throughout the world.

We have international trade banks that allow us to engage in free trade and decentralized exchange platforms.

We have commercial banks that allow us to engage in commercial transactions without being impersonated ourselves.

We are a union of sovereign nation-states. Those sovereign nation-states still exist, are still populated, and still active. At present, all fifty (50) States of the Union are enrolled and in Session.

The banks and credit unions that you are all familiar with operate in a different jurisdiction, under different foreign law. They are Maritime Commercial Banks and Credit Unions.

We are making this clear and explicit so that people can stop making common assumptions and mistakes related to the Global Family Banks and other member banks in the Bilateral Banking System:

1. These banks are designed to serve you
2. These banks are chartered by your actual government.
3. These are your banks, not THEIR banks.
4. These banks function under your international and global laws.
5. These banks are designed for the use of living people, not corporations.
6. These banks operate off the credit side of the ledger, and do not operate in debt.
7. These banks are competent to hold and trade in actual assets.
8. These banks are competent to distribute prepaid credit.
9. These banks are authorized to recoup assets and purloined property and beneficial interests belonging to living people.
10. These banks are part of a growing network of banks that work together under treaty to provide

services to living people.

- 11 . These banks can cover transactions in international trade and global commerce, worldwide.
12. These banks can provide brokerage services to liquidate foreign bonds.
13. These banks don't claim or otherwise take any ownership position in relation to depositor's money.
14. There are no bail-ins or bail-outs, no account seizures, no political de-banking.
15. There is also no coercive private transfer system in the middle of every transaction; there is no SWIFT System.
16. All transactions are transparent, instant, and private.
17. Your transaction history is not available for public scrutiny and is not sold to marketing companies.
18. These banks are competent to organize protective hedge funds and indemnity funds and restitution funds through its non-statutory bank trust.
19. These banks operate using Master Account systems so that one Master Account will enable you to access services from the banks and the Prosperity Unions.
20. These are the banks that we have designated and designed to head up the recoupment effort — to reclaim purloined American assets and American credit — and distribute restitution to the actual owners, the living people.
21. These banks and the related Prosperity Unions are totally independent of the old banking system and not-aligned with foreign fiat currencies.
22. These banks offer state of the art technology coupled with old-fashioned values and common sense. The unique QIRC codes used to connect accounts are secure against duplicity, counterfeiting, and hacking.
23. These banks and the banking network they are developing offer open participation and are anti-monopolistic.
24. These banks offer no-cost transaction service to vendors, and payment in whatever form vendors stipulate.
25. These banks set you free from endless worries about unknown banking regulations and reporting requirements that don't apply to living people and unincorporated businesses.
26. These banks, by tracking and deploying the credit side of the so-called National Debt, help to repay this in real time.
27. These banks protect the interests of public employees along with everyone else, by providing a safe haven from inflation and deflation and access to funds based on nationality, not citizenship status.
28. These banks aim to reach and serve living people all over the globe, to help them live better, happier, healthier, more peaceful lives.
29. While these are American banks, operating under American Law, they aim to work with homegrown

“sister banks” functioning as National Banks in every country. Each sovereign nation is eligible to have sovereign treasury accounts to conduct government business.

30. These are banks as banks should be — non-aligned, a-political, decentralized and devoted to peaceful co-existence and growth.

There has been a lot of ignorant controversy about these banks, because they are different. The current banking system, with all its corruption laid bare, is desperate to maintain a stranglehold on our ability to conduct business, that is, our fundamental right to trade and conduct commerce.

They have made plans to promote two separate monopolies, both involving China as the lynchpin between them.

The BRICs System is set up to monopolize physical assets, while the QFS System is designed to monopolize credit assets.

Please do not be fooled. Just because a few more countries have their paws in the pie, a monopoly interest is still a monopoly interest.

As things stand, Brazil, India, Russia and England (always at the bottom of the pile) stand ready to counterbalance China’s much-larger population and GDP, while the QFS holds China nailed to the floor using the larger British-controlled “US” entity. Thus, the British rats have neatly brokered two monopolies over world trade and commerce, both, while neutralizing China’s economic impact and effectively chaining it down in both realms — all without seeming to do so, via the artifice of using “the United States” to do the dirty work on the commercial side of this gambit.

It’s important for Americans to understand that the “United States” being referenced in these contexts isn’t our United States. The QFS (Quantum Financial System) for example is being run as a British Territorial “United States” system by our erstwhile Federal Subcontractors.

The only true American option that isn’t sunk up to its gills in corruption and monopoly interest (and British foreign intrigue), is our own Bilateral Banking System and our flagship Global Family Banks.

It has perhaps come to your attention that China has been specifically targeted and deliberately undermined both within the BRICs and the QFS. Britain has long wanted to own and run China as one giant sweatshop. They have coveted China’s labor force and its consumer base for generations. They have thought of an independent China as a dangerous competitor, yet haven’t been able to finagle a way to undermine the basic fundamentals in China’s favor.

The Brits have tried to undermine China by introducing illicit drug use and supplying opium to the Chinese consumer market. They have tried to undermine China by investment, using CIA fronts and Slush Funds, like the China Development Fund, to ensnare and obligate the Chinese. They have tried to insinuate their Social Security- style scam in China, without success, but they were able to pull off the Social Credit Score System which is just as bad or worse.

So now they have tried to “lash China to the deck” using their own unpaid balance of trade as a weapon and railroading disparate interests into — essentially, voting blocks — that will manipulate the two new monopolies, BRICs and QFS, to lock down China. And as ever, Britain is at the bottom of this dogpile, just as it is with virtually every other dogpile: Britain harassing NATO to “take action” in

Ukraine and sending its own few dozen soldiers into harm's way to create an "incident" to trigger a NATO response and a WWII' scenario, setting up and running "the State of Israel, Inc." as a deceitfully named corporate franchise used to funnel money to Netanyahu and keep his vile boat afloat despite the self-evident genocide taking place in Gaza. Just look. You will find Britain at the bottom of every dogpile.

So, no wonder that the agents and collaborators of the Bank of England insinuated themselves as False Volunteers coming to help our American "Non-Central" Bank get set up. No wonder that they subsequently dishonored themselves and tried to disable the whole effort with threats and smear campaigns and lies. They, caught red-handed running the largest Ponzi Schemes in World History, accused us of doing the same. First to last, we've called it. So don't be surprised when these characters accuse others of doing exactly what they are doing themselves. It's their hallmark, their known modus operandi.

A few of our members were taken in by this tactic, despite our repeated warnings and observations demonstrating this pernicious trait of the actual Enemy in our midst. These misled people joined the Bank of England bandwagon and denounced our bank effort as a scam, but in the end, it's the only effort that will both save them and deliver their country intact.

Britain and British Territorial Officers like Donald Trump have planned to "make nice" by returning a staggering amount of credit to Americans via Treasury Direct Accounts. What they don't tell anyone is that they owe all that credit and a great deal more to the Americans.

They owe us our land, our gold, our silver, our cash, our stocks, our bonds, and all beneficial interest in our material and non-material interests, our labor, our copyrights, our trademarks, our patents, our offices, our public resources, and all else that is owed back to our infant decedent estates unharmed.

The credit they plan to release is just a sop designed to make Joe Rank and File forget what he is really owed, to shut him up and wave him away, to fill his belly and let him seek entertainments that will beguile him long enough so that he forgets. Like giving an alcoholic a big bottle of spiked rum.

Giving back a glob of Joe's own credit to him costs them nothing, and puts nothing of theirs at risk.

In view of what they actually owe us, \$150 Trillion of our own credit is a meaningless nothingburger.

What they actually owe is an insurmountable debt, one that they can never repay. And what they most dread, other than losing control of our country styled as a "territory" of Puerto Rico, is the embarrassment of what they have done.

They have betrayed their own people, the people of the former Commonwealth, and the people of this country as well, their most loyal supporters and Allies in time of need, are precisely those they have preyed upon, disrespected, defrauded, denigrated, and sought to undermine.

It's not a pretty picture, but it is true — and this is why we cannot let any part of their illusion endure. They must be brought to terms with the reality of their own actions and schemes — and what they actually owe to the gritty British laborers and our Midwestern farmers and the common people of the world.

Throwing us a sop over their shoulder as they attempt to exit stage left with the goods, won't do.

Like throwing a piece of meat to distract a watchdog, \$150 Trillion in credit is a lot of roast beef; but it

is ultimately just a small part of restitution owed. And it is merely our own credit being returned to us in a backdoor way, that allows them to put their noses in the air and walk away with their false claims of trusteeship and ownership interest in our actual assets intact.

They might even try to claim that this \$150 Trillion in credit (our own credit) is payment for all the actual physical assets that we are owed back, unharmed. It's not. We claim all of it. We, not they, are the actual owners of the physical assets that belong to us and to our nation-states; we never authorized the creation of any infant decedent estates in our names, nor the creation of any Territorial or Municipal estate trusts, either. We have lived our lives blissfully unaware of the False Claims lodged against us, as a result of undisclosed contracts foisted off on our Mothers, foreign citizenship contracts which have remained unconscionable to us until now.

So, we speak up, and we say thanks, but no thanks.

We'll counter-offer to receive back our purloined American infant decedent estates, our Good Names, our natural copyrights and trademarks, our standing as free men and women, our land and our soil. We will receive back all beneficial interest in all material interests and assets public and private. We will embrace our own labor and the rewards thereof. We will be released from any and all presumptions of public debt,

duty, or servitude. We will also be set free from all claims of foreign citizenship, incorporation, enfranchisement, or personhood of any kind. We will accept back our purloined souls, unharmed.

We shall conduct our own business, create our own banks and currencies, plan our own lives, accept our own responsibilities, and freely make peace with the Divine without any representation or impersonation by anyone on our behalf. We shall keep our assets and our armies, our treaties and our contracts, our credit and our prerogatives, our right to self-governance.
