Federation of States

Commodity rigging is a crime.

The Central Banks rig commodities, especially assets (gold, silver, land) and currencies (Yen, Euro, Federal Reserve Notes, etc.).

They also rig the stock markets of the world.

They are allowed to do this by commercial corporations that are masquerading as governments — but which are instead only vendors of government services.

These corporations are acting in breach of trust and in violation of their own service contracts.

So you have organizations that are pretending to be valid governments allowing groups of private bankers to engage in criminal activities.

All of this is fraudulent, null and void.

That is the actual status of things in your world, and the courts and the militaries and the police are helpless to do anything about it, because they are receiving their pay and taking their orders from these imposters and criminals.

Okay?

Things got off-track during the reign of Queen Victoria, and never got back on track in all the years since then.

These criminal government services corporations have used semantic deceits and non-disclosure and illegal contracting practices to bilk the people they are supposed to Serve.

They have evaded their service contracts and obligations owed to us under contract by secretly registering us as foreign citizens.

These same False Contracts have then been used to impose False Obligations of foreign citizenship on people who are not naturally, knowingly, or voluntarily involved in

any of this rot.

These commercial corporations have also pretended to be legitimate military organizations, when in fact they have unlawfully converted our national military into a mercenary service for hire.

Mr. Trump is currently the President of a British Crown Corporation deceitfully calling itself "the United States of America" and then additionally omitting the word "Incorporated" from its name, so as to give the impression that it is our own dear unincorporated government — when it's not.

This deceit and their actual position as government services vendors has allowed our erstwhile Employees to act under color of law and in breach of trust, to impersonate our government and access our credit — which they have plundered and spent with great abandon and no regard for the people they are supposed to be serving.

In this, they are no different than any credit card hacker or similar identity thief.

The banks, including the Central Banks, have all been given Notice of these facts and they are legally and lawfully and morally obligated to return our assets and our credit to our control, unharmed. The High Courts of the world have been fully informed, and if they are to retain any credibility, must take action.
