

## Identity and the Post Office

# International Public Notice

October 7, 2025

The United States of America —  
Federation of States

For many years now, the Post Office has been the most popular government service in this country. It has the highest service rating and the highest rated usefulness of anything the government service providers do for the greatest number of people every year. Think about that.

The Post Office is really a lot more than just the Post Office we all think of. The Post Office establishes the location and identity of things and people — seats of government, roads, sea lanes, service centers, travel credentials (passports), customs offices, patent offices, standard weights and measures, the calendar(s) and measurements of time and space, stamp taxes (yes, they still exist), trademark and copyright offices, labor standards, and much more.

Countries don't have a seat of government without a Post Office.

Our country has two seats of government established on its land mass, one in Philadelphia, Pennsylvania, and one called "the Federal Capitol" in Washington, District of Columbia. Then, there is the Territorial "United States Postal Service" and the Municipal USPS, INC., and the APO and FPO and other systems that aren't, strictly speaking, Post Offices at all, but which act as subcontractors or franchise operations serving smaller specialized populations.

Jurisdiction is an important word in Post Office operations, because the Post Office has to deliver mail — reliably — in all three primary jurisdictions: air, land, and sea, as well as to the living people who naturally occupy the national jurisdiction of the soil.

Now, the news that we have a National Post Office establishing our National seat of government in Philadelphia, Pennsylvania, serving the land and soil jurisdiction owed to the people of this country, may come as a big surprise to some people who are used to thinking of Washington, DC, as the source of our government — but no, the Federal District and the Federal Capitol serve in International Jurisdiction and have their own seat of government and their own roster of services.

Throughout our history we have had men and women who have served as post masters or Post Masters or POST MASTERS and they have kept these services available in their jurisdiction.

Though it has been many years since the Post Office in Philadelphia ceased to operate as it should, it has nonetheless remained, and generations of post masters have made sure that the seat of government owed to the people of this country has remained.

The national post office is owed to the people occupying the soil jurisdiction of each country, the International Post Office serves the Lawful Persons (land) and Legal Persons (sea) and the Global POST OFFICE serves corporations, especially Municipal Corporations and the personnel associated with

them.

As the British Crown gradually usurped against its employers and continued to register American babies as British Territorial Subjects, the national post office fell into disrepair and the number of post masters dwindled until the venerable institution was hanging by a thread.

That is part of what we, together with 900 others, addressed to the Universal Postal Union in 1998 and Pope Benedict XVI in 2006, and also what ultimately led to my husband, James Belcher, serving as post master for the national post office owed to the people and International Post Master on the land, owed to the Lawful Persons.

These offices cannot be left vacant for many reasons, and yet, we were in danger of losing our credentials and recognition for our national post office and our Land Jurisdiction Post Office, too, for failure to operate them.

We are attaching a very informative document that explains, from the point of view of the court of Chancery at the Vatican, exactly what the various names applied to people mean— straight from those who created these distinctions in the first place.

This particular document issued from the universal post office judicial district (that word again) also shows that James was a post master operating the national post office (soil) and serving as Post Master on the Land, enabling the post offices of these two jurisdictions to continue to function and for the people's national seat of government to be maintained.

Please note that on the soil, we have "post masters" and on the land we have "Post Masters" and at sea we have "Postmasters" and in the jurisdiction of the air, we have "POSTMASTERS".

All these different offices and jurisdictions have to function peacefully together, so you can also see, James is said to be "neutral in public" and "at peace with the Crown" and the "One Holy".

This is the position of our actual American Government which did not take part in the so-called American Civil War. The actual States maintained neutrality and so, remained at peace with the British Crown and the One Holy, then and ever since.

We, and our States, are not now and never were subject to pay war reparations or otherwise responsible for unwelcome foreign commercial conflicts on our shores.

This is also why we fly the peacetime flag of our country instead of Old Glory.

This is why our "vessels" are naturally exempt and tax percuse, and why we, declared American State Nationals, should never be attacked or messed with by British privateers or Municipal agents working for them.

Not taking sides in a horrible conflict that could have and should have been resolved by other means is a sign of intelligence, not incompetence or absence or a state of interregnum. Our States chose peace and are owed freedom and peace in return, from both the British Crown and the One Holy.

The fact that millions of our people have been misidentified as Federal Dual Citizens and that millions of bogus public trusts have been created and mis-administered and plundered under false pretenses by members of the Bar Associations is a very sore subject which is owed immediate administrative and practical redress.

The U.S. Army and the Office of the United States Army Provost Marshal are directly responsible for crimes being committed against the people of this country — the same people they owe good faith service to, and who are being illegally and immorally latched upon and impersonated, who are suffering illegal confiscations and evictions based on barratry and crimes of personage amounting to institutionalized identity theft and filthy claims in commerce being practiced against Americans by members of the Bar.

The operations of the United States of America, Incorporated, and its various iterations have been criminal —unlawful, illegal, and immoral — for six generations, and the British Crown is still trying to brazen it out, still trying to justify registering American babies as British Territorial Subjects, still promoting illegal commercial “wars”, and the Municipal Employees being denigrated as so-called Fourteenth Amendment citizens of the United States are still being used as cheap “muscle” to promote illegal confiscation of American assets.

So, that’s the situation.

With Jim’s passing the responsibility passes on to our oldest Son, who has lived in Philadelphia for many years, keeping the homefires burning and the lamps lit.

This responsibility also passes on to each and every American who has sense enough to realize that they are Americans.

All the unhappy associations with the Federal Government and its abuses must yield to the realization that there is a Federation of States that predates the Federal Government and both the Federation and its State members and the living people populating the soil of our States of the Union, are owed peace and good faith service and freedom from false impersonation.

When we operate as either post masters or Post Masters of our own Post Office, we are working for our own American government and populating our own land and soil. We are fully enabled and empowered to do this and have done it, and it’s nobody’s business but ours — but at the same time, it’s past time for the British Crown to yield and return our purloined assets and release any presumptive claim to any ownership interest in land and soil belonging to American State Nationals.

United States Citizens and U.S. Citizens cannot own land in this country, so when they buy homes and land, it is kept in a British Territorial Public State Trust. It’s THEIR public and their citizenry subscribed to this foreign “land title system”.

The so-called Fourteenth Amendment citizens of the United States which includes US CORPORATIONS and their personnel, cannot own land in this country either, and similarly, when they buy homes and land here, it is kept in a Municipal STATE trust. And again, that is for THEIR PUBLIC, THEIR CITIZENRY which is subscribed to their own foreign municipal land description and street number system.

Actual people living in a State of the Union, which now means Alaska, too, don’t leave their land and soil in foreign public trusts. Our trusts are American Common Law trusts and they hold the actual factual land assets, not titles, not descriptions — physical surveys of actual land with actual landmarks.

It’s time for both the British Crown Corporations and the One Holy’s Municipal CORPORATIONS to support a return to honest government, honest administration of valid public trusts, and release of all dishonest public trust interests which have been created to illegally latch onto and serve as a legal

artifice used to pillage and plunder Third Party American assets.

The truth stands above the lies, the fact above the fiction.

There is no excuse for any American owning their land free and clear and having established a physical survey of that land on the public records, being attacked or evicted or accused of owing “property taxes” by any member of any part of the Federal Government or any State of State franchise or STATE OF STATE franchise thereof.

This information is being provided to all of you as a courtesy so that you can grasp the roles and the standing of the parties. There are people and some of the people serve as persons within the context of their own American Government. They have nothing to do with skirmishes, battles, collusions, or suppositions of their foreign subcontractors and are owed both peace and good faith service from the British Crown Officers manning the United States of America, Inc. and the Municipal Officers employed by them.

This also provides insight into why both State of Alaska Troopers and STATE OF ALASKA TROOPERS owe peace and good faith service to the people of this State of the Union called Alaska, and why the same conditions apply throughout this country.

We are operating our government which is the source of the powers delegated to the Federal Government Subcontractors in the first place. There should be no doubt or argument about who we are and what we are doing, rather, the Subcontractors and their State-of-State and STATE-OF-STATE franchisees need to realize who they are ultimately working for.

They also need to recognize the tax exempt and tax percuse standing of the people that they are supposed to serve, and stop their illegal latching and confiscation activities and their false claims in commerce.

We are not their enemies. We are their employers. We are not “Sovereign Citizens”. We are Foreign Sovereigns with respect to them, and not citizens of theirs at all.

Using Alaska as an example, numerous administrations have fully admitted that the land of Alaska belongs to its people, not its persons. The State of Alaska Constitution fully admits the service obligation of these same foreign persons to serve the “people” of Alaska.

So far as the people are concerned, the only “land trust” here is their own Common Law Trust — not a Public Interest Trust for British Subjects, not a Municipal Land Trust for Municipal citizens.

These attacks promoted against the people of the States of the Union have been going on far too long and have become institutionalized. This is something that nobody concerned can afford to have continue, as it inevitably breeds both injustice and violence.

The present case in which Officers of the State of Alaska serving under The State of Alaska Constitution aren’t even aware that Alaska has been enrolled as a State of the Union is typical.

The attack recently made upon myself under False Pretenses of the “Judiciary Courts of Alaska” is also unfortunately typical. We get these ignoramuses swaggering around with guns on their hips and not a brain in their head, thinking that they are at “war” with the people they are obligated to serve, evicting people from property that is theirs free and clear of any debt, based on the assumption that they are British Subjects or Municipal citizens of the United States, whose property assets are held in foreign

public trusts.

None of these employees of ours have any right, lawful or legal, to do any of this illegal latching, illegal confiscation, and illegal taking.

None of them paid me as much as a copper penny for any right or interest they merely presumed to have in my actual factual land and house that they seized unlawfully and illegally under armed force. And for the trivial “debt” they accused an unknown foreign person of, they proposed to take the entirety of my holdings worth over a million dollars — which is, again, an illegal taking under the Federal Constitutions.

All this lawfare crap and “mistaken identity” crap has to end. We are not confused about who we are; and, the U.S. Army and United States Army are both responsible for putting an end to these abuses of the people of this State of the Union and every other State of the Union.

We are calling upon everyone reading this, each of them having been instructed and fully informed to cease and desist and correct their illegal latching and illegal confiscation operations immediately.

You may all consider this Fair Notice and Public Due Process on these issues.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents. NOTICE to AGENTS IS NOTICE TO PRINCIPALS; NOTICE TO PRINCIPALS IS NOTICE TO AGENTS.
