

## International Public Notice

# Notice

January 20, 2026

The United States of America —  
Federation of States

Those who have followed along know exactly how the criminals have operated to confuse identities and names of virtually everyone and everything. No doubt these “professionals” have reasons and loyalties and justifications in their own minds for this illegal and unlawful and immoral activity, but for the rest of us, those centered on simple truths and plain language, only clarity will do.

Given the background understanding that is now Common Knowledge concerning the present situation, the three primary international jurisdictions, and the way that corporations have been used to substitute for actual people and countries using the same or slightly different names, it should come as no surprise that NESARA has been misrepresented and “cloned” and suffered name changes, too.

We have on our desks the following different representations all attached to the acronym NESARA:

National Economic Security and Reformation Act

National Economic Security and Restoration Act

National Economic Stability and Restoration Act

National Economic Stability and Reformation Act

National Economic Stabilization and Restitution Act

National Economic Stabilization and Recovery Act

National Economic Security and Recovery Act

National Economic Stability and Recovery Act

We trust that the nature of these obfuscations is transparent and easy enough for everyone to observe and so is the underlying principle of deceit.

One acronym can be made to account for almost anything.

“FBI” might stand for “Federal Bureau of Investigation” but even that might stand for a different “Federal” and a different “Bureau” and might refer to different kinds of “Investigation” than anyone imagines. The same acronym might stand for “Federal Bureau for Investigation” and be another unexpected entity entirely. It might even stand for “Frivolous Bureaucratic Insanity” or “Friends of Benevolent Immigrants”.

Acronyms and abbreviations are thus rendered essentially meaningless without explicit definition of exactly what they stand for.

All eight (8) of the various Acts described above are presumed to be different proposed or adopted Acts of some unidentified political body, or bodies, all of which could be referred to as “NESARA”.

Thus, is it necessary to explicitly speak about what “NESARA” is and which “NESARA” we are talking about.

We are talking about the original NESARA legislation titled the National Economic Security and Reformation Act proposed as a remedy for farmers and ranchers who were victimized by land grabs

initiated by the Federal Land Bank, a franchise of the Federal Reserve System.

This Act was intended as remedy and restitution for over a decade of litigation concerning what came to be called “the Farm Union cases” and was supposed to result in the Farmer’s Claim Program, but as usual, no actual remedy was forthcoming.

The reason? Because the banks were exercising foreign land titles against foreign public trusts established in the names of Americans, and as such, the injuries were as fictional as the “loans” made to these farmers and ranchers.

It was all bushwah and the discovery in these cases proved this to be true to the satisfaction of the U.S. Supreme Court and Supreme Court of the United States without remedy and without restitution.

How could American Farmers and Ranchers be evicted from their homes and land based on “loans” of debt notes? That is, I.O.U.s issued by the private Federal Reserve Central Bank using the Federal Land Bank as a proxy?

How could Americans be evicted from their land and property based on foreign land titles they never authorized? And when the victims were the actual owners of both the land and the credit being doled out by the Federal Land Bank?

More deceit, more legalese, more fraud carried out by members of the Bar Associations secretly working as bill collectors for the banks, and banks that had no lawful or legitimate legal claim to the physical property assets— nor the “credit” they loaned — to begin with.

After winning their cases, after over a decade of litigation, the courts said that Congress would have to appropriate money to repay the farmers for the loss of their homes and lands and for the costs of the

litigation and all the other damage they suffered in the process.

And of course, the Congress just laughed. “What? Us pay our debts? You have to be joking.”

They never had a pot to begin with. They were always appropriating and allocating funds based on other people’s money and other people’s assets — including assets belonging to the same farmers and ranchers who were the victims of the scam.

The National Economic Security and Reformation Act was a big joke inside the Beltway. Congressmen and Senators held their sides. NESARA would be funded by them when Hell froze over.

What followed was another three decades (almost) of slogging, of Farm Aid Concerts, of desperate efforts to keep families on family farms and ranches, gruelling long years of suffering and heel-digging.

Slick attorneys and hired “Federal” Agency employees asserted interests in foreign public trusts named after Americans that never legitimately existed, and used this as an excuse for continuing coercion and False Claims in Commerce.

One by one, the original Farm Union claimants died off. One by one, their heirs gave up or struggled on. No remedy. No restitution.

Until now.

Now comes the reckoning and the balancing of accounts that has been put off for decades.

And finally, remedy and restitution for the farmers and ranchers, the real NESARA that they and all Americans are owed.

Part of the fraud was predicated on the idea that the farms and ranches were in Territorial “States” not States of the Union, and that the British Crown still held the ownership interest in these enclaves, pending their enrollment as actual States of the Union.

For decades these “States” were promised Equal Footing, and yet, the British Territorial United States Government could not provide that. They could only provide the illusion of actual State of the Union status, while continuing to bilk the people they were supposed to be providing with “good faith service” under The Constitution of the United States of America.

Foreign law, foreign taxes, foreign “States”, foreign courts, foreign “persons” — all passed off as “American”. Land ownership and possession by grant, replaced by “National Trusts” and ownership claims advanced by the British Monarchs and Roman Pontiffs under conditions of non-disclosure and deceit. American farmers and ranchers misidentified as British Subjects, American land “managed” and taxed by foreign public trusts, the actual American owners misrepresented as “civilly dead entities” — and those secretly advancing these False Claims never paid the victims an actual penny for any of the land and assets and copyrights they laid claim to.

Finally, in 2019, properly provenanced and declared Americans brought the established States of the Union into Session. On October 1st 2020, the States of the Union that were established prior to 1861 voted unanimously to accept and enroll the Territorial States as States of the Union, retroactive to the date these states entered Territorial Statehood — all unaware of the “bait and switch” fraud the foreign federal service vendors had pulled on the people of this country.

So now, instead of being “States of States” or any form of “State” defined by the British Territorial United States Government, Washington and Arizona and Nevada and all the other so-called “western states” formed as Territorial “States” and never actually enrolled as State of the Union, received their land and soil jurisdiction powers under the provisions of the Northwest Ordinance, and finally entered into Equal Footing with all the other States of the Union.

Millions of acres of land and soil were reclaimed by the living people and their States of the Union, no longer presumed to be permanent holdings of foreign public trusts managed by the British Crown and Roman Curia.

To put it in the language of the British Brigands who engineered this circumstance, the “heirs returned home from over the sea” — where they never actually ventured.

Unless someone actually wants to adopt the status of a British Subject and takes determined, fully disclosed action to establish such foreign citizenship obligations, everyone born in this country is presumed to be an American State National without regard to any registration of babies or British Crown copyrights established on American Given Names.

We are not deceived and we are not putting up with any additional European flim-flam.

Remedy and restitution for the farmers and ranchers is here and now, the actual NESARA, The National Economic Security and Reformation Act, not a British or Italian look-alike version, is hereby adopted and announced; this International Public Notice and Declaration provides full lawful and legal authority to: (1) secure and return the United States Land Patents, cadastral surveys, titles, grants, deeds, Municipal land descriptions, etc., to the rightful American State Nationals and in the case of Public Lands, to the lawful States of the Union; (2) arrest and prosecute any Undeclared Foreign Agents including Esquires and members of District Courts operating outside their strictly limited jurisdiction and misaddressing Americans as foreign citizens; (3) provide immediate and continuing remedy and restitution to all American farmers and ranchers throughout The United States who have received loans of their own credit misrepresented as “bank loans”, suffered foreign taxation — including mortgages and property taxes and income taxes — they never owed, and who have suffered impersonation and barratry at the hands of persons who owe them “good faith service” under contract.

The remedies so long owed to the victims of the Federal Land Bank and also the United States Small Business Administration are available now. NESARA, the actual NESARA, is here.

Details and further announcements to follow.

All Claimants are asked to go to the Global Family Bank Land Recording and Publishing Service (LRPS) intake webpage and set up an account — an American bank and an American bank account that stands under American Law.

A summary report of the history of the actual NESARA initiative is attached. Farmers and ranchers who suffered similar outrages in other countries are also asked to set up their accounts in preparation for remedy and restitution.

So said, so signed, so sealed:
