

Knowing What You Are Looking At

International Public Notice

October 26, 2025

The United States of America —
Federation of States

Take Notice:

The bankruptcy of the UNITED STATES, INC. — the Municipal Corporation umbrella — was announced during the Obama Administration. It was precipitated by Pope Francis placing the corporation in Chapter 7 Involuntary Bankruptcy soon after he came to power in 2013.

What we are looking at, twelve years later, is the end of that bankruptcy process.

Washington, District of Columbia, has to be shut down for 120 days at the end of the bankruptcy. This is the final “clearing” of the bankruptcy.

During this shutdown, which happens no matter what Democrats or Republicans do, “the government” appears to shut down because the corporation that was masquerading as a government is shut down.

What we are looking at is the closure of a governmental services corporation, not a closure of the actual government.

This circumstance and the whole process antecedent to it, has been thoroughly, purposefully, misrepresented to the public here and abroad.

So has another mandatory process related to the bankruptcy — the fiscal auditing of the departments and agencies that are franchises of the bankrupt entity.

Although it was positioned to look like a clean up of bad government, the actions of the new Department of Government Efficiency, DOGE, have all been mandated by the bankruptcy process.

All the franchise operations affiliated with the parent corporation have to be audited and shutdown, too. Those that are going to remain in some form or other under the auspices of the United States of America, Incorporated, will be restructured and renamed.

So, the DOGE clean up was forced on the Trump Administration and they have made some political hay with it; the government shutdown is also mandated by a bankruptcy process that Obama initiated, and it will last four months no matter what anyone does, and the Trump Administration is being blamed for it.

We heard Joe Rogan criticizing Trump and Speaker Johnson and accusing them of having “no plan to end the shutdown”.

Of course, they have no plan to avoid something that can’t be avoided.

Here's the facts, folks. The UNITED STATES, INC. is gone, never to return. It accounted for two-thirds of the Federal Government, and all of the Federal Civil Service and all the Municipal STATE OF STATE Services, too, plus half of all the Federal Agencies.

The remaining Federal Subcontractor, the United States of America, Inc., is on the ropes itself and can't possibly absorb all the workers and departments and agencies that were supported by the UNITED STATES, INC. And it has to be careful to retain sufficient funds to perform on its own contracts.

So, no matter who is in office or which political party takes the blame, there are going to be millions of federal government jobs lost and programs that various constituents depend on will be shut down — some permanently, some to be reopened under a different name when the United States of America, Inc., gets refunded four months from now.

Message to the clueless among us — no “government” for four months and an extra 5 to 7 million direct federal jobs lost, means around thirty million jobs lost, total. It also means widespread suffering of all the displaced workers and the program recipients they served right smack dab in the middle of the winter.

Economically, in human terms, you are looking at a disaster of major proportions and the reasons for it and sources of it, are not hard to comprehend.

This is not the doing of the Trump Administration, which had nothing to do with this debacle, which was set in motion by Pope Francis in 2013, formalized during the Obama Administration, and it is finally coming to roost during the Trump Administration.

We know precisely how long the shutdown has to last. We know more or less precisely how many jobs will be lost and how many people will be harmed.

They are just not telling you this, because they are afraid. And they should be afraid, because none of this should have ever happened. It's purely the fault of the Principals and Management of these two corporations.

They are also indulging in numerous other lies and obfuscations.

For example, they are spreading the idea that your “fiat” dollars are worthless and that they were created out of thin air, but in fact, they were backed by the value of your labor and your intellectual property as was explained in our book, “Blood Money”. And this was further supplemented by the British Government's “Uniform Securitization Scheme”.

It started out as the “Universal Securitization Scheme”, but “Uniform” sounded better.

They created millions of obscene, phony securities.

That's where the real problem lies.

They weren't content with illegally latching upon the value of your labor over the course of your lifetime as an “asset” backing their corporation's spending, they inflated this base value by securitizing it and loaning money against it.

Thus, they created an unconscionable obligation for you, which they misrepresented as “taxes”, and they inflated the base value of your estimated lifetime earnings by ten times, more or less, so that they had plenty of “money” to “loan” at interest to other victims of this same securitization scheme.

The problem is that when you use someone's labor as a security you subject them to peonage, if not outright enslavement, which has been outlawed worldwide since 1926.

And if the securitized work force or individuals within that work force can't perform at the rate calculated, or if for some reason, their labor becomes less valuable — all sorts of nastiness ensues.

Well, now, we've got a real Trifecta.

Unemployed people can't produce the labor value backing their own position, much less carry nine times that issued as loans projected far into the future. And we now have millions upon millions of workers unemployed by the "government" shutdown.

And approximately 25 million "illegal" aliens, also largely unemployed.

This is what is guaranteeing the collapse of the fiat currency; it always had value, but that value was drawn from illegal betting and illegal securitization of your labor, and the sale or leasing of your intellectual property — use of your Good Name, which the British Crown Corporation copyrighted without your knowledge or permission, use of your labor as a security, use of your patents and copyrights and trademarks, etc.

All that was rolled up in one big "securitized" package, known as a "PKI", and sold to investors, too.

They securitized the value of your homes, too, which should be no surprise. If they could securitize you, they could certainly securitize your homes and land and farms and garages.... which they did.

All those "home loans"? They didn't tell you that they were borrowing your home (loaning it to them, yuk-yuk) so that they could create and loan out — at interest — ten times the value of your home to other victims of their scheme, and then collect the cost of all this out of your labor for the next 30 years, while they hold a totally unearned security interest in your house over your head.

That wasn't bad enough, they had to create "mortgage backed securities" on top of it, and lump all these grossly misrepresented and fraudulently purloined mortgage contracts together, and re-sell the same phony, illegal, unlawful, immoral contracts to investors betting the a majority of those mortgages would be paid back at interest and they'd get their cut.

That's what has really been going on here for decades.

Unbridled, unregulated, undisclosed, outrageous corporate mismanagement and greed, based on phony securities and unconscionable debts — and most of all, unconscionable citizenship contracts.

Americans are not subject to any citizenship contracts and owe the government nothing, no service, no assets, nothing, at birth. But British Subjects are automatically subject to lifetime debt and service obligations to their "king" and Roman Municipal Subjects are subject to lifetime debt and service to their "Pope" — both.

So it was desirable on both the part of the British King and the Pope to mischaracterize and misrepresent Americans as British Subjects and as Roman Municipal "citizens of the United States".

That's what they did with their "universal registration" of babies born in this country, that started with the "Maternity Acts" foisted off in the 1920's by the British Territorial U.S. Congress. Of course, this registration was only supposed to include British Territorial U.S. Citizens.

Right. But they very liberally and without disclosure addressed millions of Americans and "registered"

virtually our entire population under False Pretenses, saddling hundreds of millions of American babies with the False Presumption that they were “federal dependents” and U.S. Citizens and British Subjects almost from birth.

This allowed the British Bar Flies to latch onto American assets and use the projected value of the American baby’s lifetime earnings and their Good Names and their other assets (all balled up in a “State” trust) as a basis for their government to borrow against.

So all this has been a con game against the living people of this country, and ultimately, the living people of every country wherein these mercenary corporations have operated.

We are left with the situation wherein the corporations functioning as “governments” — secretly, to be sure, but true nonetheless — are bankrupt criminal organizations, together with the central banks which allowed all this — and we, the living people, are their creditors.

All this can be resolved neatly enough by discharging all the Odious Debt that these practices have accumulated, plus all the “National Debts” owed by the personnel operating these corporations— and obviously, putting new management in place, and collecting back all the purloined assets for the benefit of the actual creditors: the living people of each country.

Enter the Office of the Fiduciary of The United States of America.

Welcome home, folks. It’s a helluva shit show brought to us by the Roman Pontiff (prior to the dissolution of that office in 2011) and the British Monarchs (including Charlie III).

So you can stop blaming Donald Trump and start supporting our Fiduciary Office, because at this point, Anna Maria Riezinger and her Officers are the only ones who have the authority and standing necessary to resolve the Mess in favor of the living people of this planet — without war, without chaos.

To support the Fiduciary, go to:

<https://tasa.americanstatenationals.org/>

Note: we don’t use Google and if you try to look this address up on Google, they will try to redirect you to the Organization of American States, which is an old UN organization.

You can use the donate button to transfer as much as you wish. It goes into an operations fund that allows the Fiduciary to maintain her office, hire experts, conduct legal and lawful suits at Law, collect purloined assets, support the new independent American Government chartered Global Family Banks and Prosperity Unions, provide support to critical researchers, pay for travel expenses, and conduct other crucial operations.

To reclaim your birthright and your political status as a living man or woman expatriating from any presumed foreign citizenship obligations, you can find your local State Assembly on the above-referenced TASA website, or you can go to:

[LRPS](#)

This is the worldwide gateway that people from all nations may use to obtain both their political freedom from “presumed” foreign citizenship obligations, and their bank account, which will allow them to directly receive gold-backed and prepaid credit funds.

Additionally, there is the Bucolic Living Law website: <https://bucoliclivinglaw.com/>

Bucolic Living Law is especially for farmers and landowners, though other people may use the website, too. It's geared toward publication of land patent claims and assisting farmers to obtain help as we go forward.

The debts they are trying to collect from average Americans are not as Scott Bessent and others have tried to mischaracterize it, "America's debt". These are the debts of the British Empire and the Holy Roman Empire. Don't be silent and don't wait and don't be afraid.

Donald Trump is not the problem, nor is he the answer.

His "presidential office" is as President of the United States of America, Incorporated. He has to do what the Board tells him to do.

He means well toward the American people, but he is trying to play from "inside the box", whereas our American Fiduciary Office can bring power to bear from outside the box.

Together, we can "flip the debt" of these corporations and Principals and use the credit that the living people are owed as one source of long-term funding that benefits everyone. Applying the "National Credit" owed to the Americans, Canadians, Australians, Germans, French.... people, immediately cancels out all National Debts and all interest payments on all National Debts, thereby relieving the credit crisis.

Other Odious Debts can be cancelled, one by one, and as we clear large blocks of such "debt", additional credit resources are reclaimed and opened up.

After that, Consumer use of their prepaid credit extracts more and more fiat dollars from the impacted economies and returns value to the fiat currency at a gradual and absorbable pace.

There is no need to crash and burn the fiat economy and nothing wrong with using commercial paper for transactions.

The problem is the British Uniform Securitization Scheme and the false securities and false security interests that they have created for themselves, which is then exacerbated by their illegal latching upon other people's assets and attendant false claims in commerce.

This has been a problem off and on for 300 years as the Brits have attempted to deal with their own problems by using legalistic means to defraud and illegally latch upon other's assets.

For the good of the whole world, this has to come to an end and be dealt with, and none of the "Presidents" or "Prime Ministers" can do what needs to be done, because they don't have the lawful standing to do it.

There is exactly one (1) government with the resources and the standing to do what has to be done, and one (1) office within that government that has the power to correct this whole Mess — and that is our American Federation of States and our lawful Office of the Fiduciary, working in tandem with the remaining lawful Native Nations and National Governments to bring about peaceful and immediate solution to this worldwide crisis.

The military government can help by throwing its full support to our immediate assistance, and the assistance of our Fiduciary Office, realizing that their true mission is to protect the living people of this

planet, and the planet itself. Protecting corporations is not the mission.

We have enough gold and silver to run a substantial portion of the world economy while the fiat currency debacle gets cleared up, and that, rationally, is what should and must be done.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.
