

International Public Notice

December 4, 2025

The United States of America —
Federation of States

Yesterday, we issued ten (10) Directives to President Donald J. Trump, all of them within the purview of his Office(s) directly or requiring his assistance to accomplish and bring government operations into compliance with existing land jurisdiction law. The text containing those Directives appears in normal body type, the questions and the answers about them appear in boldface:

(1) Leave Venezuela alone and leave Venezuelan oil alone. Concentrate on development of the Eastern Rockies Oil Basin. If other countries don't want to sell us their natural resources, that's fine. We will develop our own — cleanly and safely. Theodore Roosevelt's Natural Resource Policy no longer applies in 2025.

How does the Federation get to issue orders and tell the Commander-in-Chief what to do?

Answer: The Federation is the actual Delegator of the Commander-in-Chief's delegated Powers. He is our employee under contract. It's our job to speak up, his job to keep his nose clean. Commander-in-Chief is a Naval Office, and though the British King is a Trustee on the High Seas and Navigable Inland Waterways for salvage operations, we have our own American Admiralty to serve and no need for salvage.

Addressing Mr. Trump about this urgent situation in and around Venezuela is not a reflection on him, but is a reflection on the Principals backing his corporations.

We have known for some time that they desire to ignite World War III and also are intent on staging a Do-It-Yourself Armageddon in the Middle East. They want to do these things because they make money on war and they are increasingly out-of-pocket.

Venezuela is formally allied by co-defense treaties with China and Russia. If Mr. Trump attacks Venezuela, Russia and China will be honor-bound to respond by attacking us. The whole of the Gulf States region would be instantly exposed, as well as triggering the possible use of nuclear arms and hypersonic missiles.

So we are putting the cards on the table for everyone to see exactly what Mr. Trump's marching orders from us are. We are making it clear to Venezuela, China, Russia, and the Committee of 300 that not only are we not interested in war with Venezuela or anyone else, we are interested in rewriting outdated Colonial Era Natural Resource Plans and getting on with our own development.

If Mr. Trump now proceeds to create a war scenario with Venezuela everyone will know who to blame and who to attack, and it won't be America.

(2) Close and maintain reasonable, customary, and prudent security of The United States borders and immigration. Proceed with deportation and evaluation efforts. Let this unpleasant job be accomplished without drama and with respect for individual people and families. Allow them to contact family members and if they came with wives and children, arrange group deportation of their children, spouses, and personal belongings so that they can leave as they came— as families. Give them safe transport back to their country of origin and whatever reasonable support we can offer toward their

resettlement. This is not about cruelty or politics. This is about maintaining our own Public Law and integrity. Anyone who can demonstrate that they have realistic fear of political and/or religious persecution such that they genuinely need asylum should be set aside for special naturalization assistance. There is funding set aside for these needful purposes.

Question: Why does the Federation support Trump in deporting all these people?

Answer: It's Public Law. Joe Biden broke it. Someone has to clean up the resulting damage to everyone involved. We are sure it is very frustrating for the Trump Administration to spend its energy correcting an arbitrary and criminal lapse that is actually the fault of the Biden Administration.

We regret that so many people and so many families, especially, are being hurt by this, but there is a dark side to this that most people remain unaware of. Every single person who walked over our Southern border was vaccinated. That means they were, essentially, ear-tagged as U.S. chattel property and relegated to the status of "transhumans", literally owned as slaves by DARPA, and stripped of all human rights.

Our country was used as the "Candy Store" and all these people were enticed here under False Pretenses, just as Americans and everyone else was lied to about the nature, purpose and purported safety of these infamous injections.

Massive corrections and restorations of local and national economies are being planned, so living conditions should within a short time equalize, and the returning immigrants will be needed and will enjoy restoring and building their own homeland. There is already a large "backward migration" from the US to Africa as a result of the development of the African Union. Expect similar opportunities and developments worldwide.

(3) Cut off smuggling and human trafficking from all sources, including Eastern Canadian conduits. Increase air and water reconnaissance over the Great Lakes. Increase security and inspection on traffic through the St. Lawrence Seaway, and thru-traffic on all five lakes. Pursue integration talks with the Far Western Canadian Provinces wishing to become Territorial Administrative States and make sure that they understand that this is merely a step on the way to becoming a complete State of the Union.

Question: Don't we get to say whether Canadian Provinces can be States?

Answer: Yes, we do. But they are guaranteed the right to seek and receive Territorial Administrative Statehood under The Northwest Ordinance, and can then be enrolled as State of the Union. This was built into the laws governing development of our two countries and goes all the way back to the Hudson Bay Charter.

(4) Plan for integration of the U.S. Marshals Service into the Continental Marshals Program which is replacing the old defunded Federal Marshals Program to form a competent shield against international crimes on both land and sea.

Question: Why would the U.S. Marshals have to integrate with the Continental Marshals?

Answer: Because an effective and cooperative international police function is needed on both land and sea. Making these services work together as two parts of one organizational structure ensures that that happens. It also makes sure that half of the overall function is not defunded, leaving a gaping hole in our defenses against international organized crime.

(5) Redirect the FBI to focus on its original mission of detecting and preventing interstate crimes and its original jurisdictional mission limited to the Continental United States, and United States Territories and Possessions.

This set up and mission assignment was always the intent for the FBI and they achieved their best results and highest professional accolades while working within it. As we return to land-based government we are restoring their traditional functions and roles so that they can concentrate on

preventing real crimes and no longer be used for ignoble commercial purposes and as hitmen for political agendas.

(6) Similarly redirect the CIA to focus on its original mission and service area outside the Continental United States; refocus on intelligence gathering, detection, and assessment of offshore threats.

This is restoring the CIA to its original role and turf and getting them out of the Black Ops and Regime Change business.

(7) Redefine the National Security Council so that it is an American National Security Council; it's fine to consult with experts from a hundred different other countries, but those experts should not be sitting as members of our National Security Council and making or unduly influencing decisions about American National Security.

This is redefining which "nation" the National Security Council is serving and giving clear instructions about how we want our National Security Council run. If you look into the National Security Council you will notice an odd thing. There are very few Americans on the National Security Council. This corrects that situation.

(8) Find a new American Paymaster for the U.S. Military; it is not appropriate for SERCO, a British Corporation, to be acting as Paymaster while these men and women are in service to this country; secure the budget for the military functions and administer the disbursements accordingly.

Britain has been running our Armed Forces as their Armed Forces and that is not appropriate. Although it has not happened and should not happen, it is possible that Britain could withhold payment and cause paralysis of American Armed Forces deployments and operations. This system thus gives another foreign power inordinate and inappropriate control over American Armed Forces. As they resume operations as a traditional national military, our Armed Forces are not "for hire" and not subject to an international vendor system.

(9) Prepare for reintegration and normalization of the U.S. Military as part of the American Armed Forces. Everyone will be serving in a public, non-bonded capacity, under fully disclosed service agreements, as honorable volunteers. All service members will receive a 25% pay raise above their current rate as soon as possible, including military pensioners. Full dental care will be added to military insurance coverage for all active duty, reserves, pensioners and their dependents. No member of the military services or any dependent of theirs will ever be denied any medical or dental service on the basis that they refused services, for example, denied treatment for kidney disease because they refused to be used as a lab rat and vaccinated with experimental goop. Active duty members will be fully provided with complete million dollar personal life and permanent disability insurance packages made payable to their spouse, if married, or designated beneficiary/caretaker; this is to be in addition to all and any current benefits. Veterans separated from the service and unemployed through no fault of their own will be eligible for Service-Related Unemployment Payments and assisted to find jobs. Homeless veterans will be given generous housing vouchers and if substance addiction or mental illness is involved in their homelessness they will be eligible for full-boat residential care, just like the rich people receive when they break down and run amok. There is plenty of money set aside for this. No matter what their duty station, no American serving in the American Armed Forces will ever be denied the benefit of the Constitutional Guarantees. All people born within the borders of a State of the Union or fully naturalized to a State of the Union will be recognized as American State Nationals, regardless of any registrations purloined from their Mothers when they were babies. All members entering the American Armed Forces will be fully informed about the meaning of citizenship, foreign citizenship obligations, and fully and without deceit informed regarding the choice to accept or decline foreign Federal Citizenship and/or retain their American State National status. Foreign citizenship cannot be presumed upon or against any American, anywhere, at any time.

Our military was denigrated without their knowledge to the status of a mercenary force. Service

members were illegally conscripted and press-ganged under force of the draft. They have been denied their American identity and the Constitutional Guarantees they are owed.

Our military has been owed pay raises and other considerations since the 1940's that they have not received. Under Public Law, they are owed and must be paid and provided benefits already allocated but not implemented. We are just beginning the process of actually paying service members what they are owed.

From the position of the Fiduciary Office, a great deal of investment has been made in these men and women before they ever enter the military. Things like dental care prevent other more costly health issues and diseases, so we gain not only better health overall, but less overall medical expense.

The British have been buying life insurance and setting up life force value annuities on our service members; instead of our service members and their families being insured against death and disability, the King is the beneficiary — while we pay for these policies that basically cover the King's rump for loans he has taken out on the victim's labor and homes and other assets without their knowledge or consent.

This is overdue housekeeping and is a matter of correction and compliance with Public and International Law. It is also in some parts a Fiduciary decision to invest in dental care now that greatly reduces the cost of more long term medical conditions later.

(10) The foreign Judicial Districts which have been allowed to exist and proliferate throughout The United States are to be immediately and permanently shut down. The District Courts operated under these Judicial Districts and the various State of State franchise District Courts/COURTS that have been used to practice personage and barratry against average Americans who are not knowingly, naturally, or voluntarily acting as Federal Dual Citizens are to be closed to public business and directed to exonerate all cases involving Defendants or DEFENDANTS appearing to be the names of individual Americans, return all property seized, issue restitution of not less than \$500 a day and not more than \$1000 a day per day of incarceration inflicted on these same Americans, issue notification of the awards, and provide enforcement support to return the properties illegally confiscated and otherwise make amends appropriate in each case. These judges and attorneys need to be publicly disgraced for their disservice, deceit, and their own criminality in pursuit of undisclosed unjust enrichment, conflict of interest, and lack of delegated authority. It will now be their job to repair — to the extent possible — the damage they have done to other lives, to American families, and American property while acting in breach of trust and under color of law.

Question: How can we do without the courts?

Answer: Force them to operate under land law and continue to boot up our own State Courts and local unincorporated County Courts.

These courts have been caught dead-to-rights in an institutionalized aggravated identity theft and illegal confiscation and armed racketeering under force scheme; every day they are committing gross crimes under color of law. Every day Americans are being accused of crimes they didn't commit and charged for fees, taxes, mortgages, and other bills that they don't owe.

These courts have been the means of extraction for the Perpetrators of these personage and barratry crimes, which have been pursued under False Pretense of war, war reparations, and voluntary consent.

The victims were never made aware of the otherwise unconscionable contracts binding them to act as British Subjects, much less any "conferred" Municipal citizenship of the United States. They have been prosecuted and injured by this fraudulent misrepresentation and the purloined birth registration contracts that go with it.

The criminality of these courts started in 1865.

It's ending in 2025.

Mr. Trump and his franchise of the British Crown Corporation are under direct demand from our lawful American Government to bring these crimes to an end.

Some people have asked why these Directives are being issued by the Fiduciary instead of the Head of State.

The Head of State functions as the Unpaid Owner of the Government and has an oversight function to maintain the health and lawful operation of the American Government, but the functions except for issuing Proclamations and Pardons and ceremonial appearances, are handled by volunteers or paid employees.

The Fiduciary Office of the American Government functions as a mini-Congress during times when no Continental Congress or Federation Congress is in Session; the Fiduciary and Deputies follow the Prudent Man standard in the administration of their duties which allow for the Continuance of Government when our respective Congresses are not in Session.

Unlike the Federal Congresses which deal largely with their own delegated duties and personnel and program issues in a legislative format, the Federation Congresses are meant to deal primarily with what would be called Public Policy issues in a corporate setting, but in a pinch, they can take up the more mundane functions and replace service vendors, augment labor contracts, and take other actions as necessary.
