

Regarding the People's Clean Resource Acts

International Public Notice

December 1, 2025

The United States of America —
Federation of States

Many of you are in receipt of "The People's Clean Water Resolution Act", "The People's Clean Air Resolution Act", "The People's Clean Land and Soil Resolution Act" and the associated Maintenance Order requiring compliance.

These are Lawful Orders, not Legal Orders. They are coming from Americans acting in their Lawful capacity, All State Assemblies should now be in receipt of these Orders and I trust, be acting in support.

For many years, indeed, since the so-called American Civil War, our country has been under illegal occupation by commercial mercenary forces — all unaware of this circumstance. It was done under conditions of secrecy, deceit, and color of law.

Even the military officers and enlisted most impacted by this change from a lawful military to a private mercenary force were unaware and deliberately deceived about the nature of their service.

In the decades since our military and afterward, our Federal Civil Service was commandeered, enemies of humanity have been "asset stripping" our country and many others under a virulent new form of Colonialism carried out in a new jurisdiction.

The old European Colonialist "powers" only pretended to give up and quit business; in reality, they switched jurisdictions — stopped operating under the jurisdiction of land law, and began operating under the jurisdiction of the sea.

They were attempting to make another such change and stop their operations in sea jurisdiction while opening up new operations in the jurisdiction of the air — when we caught them and called a halt to it.

None of this should have ever happened.

The British Crown Corporation and Roman Municipal Corporations operated by the Secular Government of the Roman Catholic Church together with the Lord Mayor of the Inner City of London, have been the principal players engaged in this criminal enterprise.

During these intervening decades the same foreign corporations and the soulless men operating them have been not only damaging the Earth by polluting it and failing to repair it in the wake of their resource extraction activities, some among them have been purposefully poisoning the Earth and our food.

Instead of stopping all this, our military and other public employees were ordered to assist and expedite this process of stripping, polluting, and poisoning. It made no sense.

Neither did the inside job assassinating President Kennedy, his brother, Robert Kennedy, and Martin Luther King, Jr. There have been many other inexplicable instances of evil and deceit, orders given, orders covered up, people murdered, public resources sold — Uranium One is just an example, and then, there was September 11th, 2001 — and another massive, obvious, inside job.

Our people may look stupid. We may be too trusting and placid by far. But more and more of us began to wake up. Quietly. And we slowly began to glance at each other and bump elbows....

As of November 17th 2025 we were advised of the settlement of the UNITED STATES bankruptcy; as of November 21st 2025 the American Federation of States which has done business as The United States of America — Unincorporated — since 1776, is back in control of the Municipal Government resources and personnel and is enforcing the performance obligations and limitations of The Constitution of the United States of America on President Trump's Administration — which, to be fair, they were trying to meet already.

They saw the freight train coming, because many members of the military woke up before the rest of us and word got around.

All over the world.

Cleaning up the damage done to our homeland is one of the first concerns that we, as a Government, have. As clearly and repeatedly stated, the only reason to have a government is to protect the people and their assets. Their assets include the air, the water, and the land and soil we all depend upon for our most important asset — life.

To repair the damage done, to restore the air, the water, and the land and soil, is a top priority as a result, and maintaining these resources for future generations is also required. So instead of side-stepping this reality and trying to wring meaningless paper profits out of the land and soil, instead of ruining our shared air and water, our Government is doing the right thing for the right reasons. It's acting to protect your assets and your life.

We've often discussed the new roles of the military — roles actively supporting life, instead of death. So you will see our military redirected and undertaking new initiatives. DARPA will have more to think about than promoting obscene patent holder claims and asserting ownership interest in living people.

You will also see a vast reorganization of law enforcement, peacekeeping, and agency work assignments. Some agencies will have new work to do and many will return to traditional work that they were taken away from.

This is, first and foremost, a return to sane, common sense, people-oriented governance and the goal of all this activity is plain for everyone to see and get on board with: to protect the people and their assets.

As of our Joint Proclamation/Restoration Proclamation, that's the only agenda. The resources of the Municipal Corporation "Government" are back online and being redirected and reorganized.

The resources of the Territorial Corporation "Government" are being employed according to their service contract, The Constitution of the United States of America.

We are moving as quickly as possible to provide restitution to the American people — the return of their lands, money, homes, businesses, good names, copyrights, patents, trademarks, and other assets that have been stolen under color of law, illegally confiscated, and manipulated by evil men seeking to unjustly enrich themselves.

Our land jurisdiction banks are ready to serve eight billion people.

There is some confusion about this, but physical assets and also intellectual and energetic assets of the living people and the Earth are land jurisdiction assets and they must "come home" to land jurisdiction banks.

Otherwise, the land jurisdiction assets remain captive in the same old jurisdiction of the sea miasma, subject to the Law of the Sea, and ownership of the British King. We think it is self-explanatory why we needed to build a new, fresh, and honest banking system to serve the living people and lawful business enterprises.

Of course, the British Empire is still trying to seize victory from the jaws of a well-deserved death, but we trust that common sense and true self-interest will prevail as people wake up and the light goes on

and they realize: "Land jurisdiction assets belong in a Land Jurisdiction Bank."

Imagine that? Having our land jurisdiction assets commandeered and left in Maritime Banks of Commerce for decades is ninety-percent of what contributed to the crimes against humanity and against this country and its people that we are addressing.

We won't be tricked into that "cosy arrangement" again.
