

# The No More List

## International Public Notice

May 3, 2026

The United States of America —  
Federation of States

Everyone Notice that Peter Thiel, his buddy and co-founder of “the United States of America, LLC” in London just launched, in effect, a “stablecoin” bank, at the same time that the SEC has been given a death sentence (brokerless trading), and the entire crypto currency industry goes lock-step to demand political action from Congress to update the “Clarity Act” and consolidate their power over this new financial system.

Did you vote for it? Did I? No, a group of billionaires associated with and linked together through the Trump Administration are preferentially orchestrating all of this for their own advantage.

I don't hate Donald Trump. Never have. He has done some good things for this country and the planet, but I recognize that he is Number 18 on the power hierarchy totem pole and there are ten positions above him in the corporate government scheme. He takes his orders from Whitehall and Rome and now, Jerusalem. And, although he is “a” President, he is not the President that our Founders intended to lead this country. (There are actually supposed to be six (6) presidential offices, and Trump occupies one (1) — but that's another story.)

So there are some real problems with what Trump is doing.

No doubt, he justifies it in his own mind between “just taking orders, ma'am” and “the ends justify the means” but we take a different view of things. We know that we are building a future, not just hopping on an opportunity to make a buck and gain coercive control. Not just rewarding political supporters.

We don't want to go through this Mess again in 20-50 years, as a result of building anew atop flawed and fraudulent foundations. We want it done and taken care of once and for all.

It is our avowed and determined intention to restore both the American Government and the Federal bureaucracy to full function and operate it as the Founders intended, or otherwise, convene a Continental Congress, educate the delegates regarding the actual history and structures we are supposed to have, and let the public debates begin.

No more Admiralty-Maritime contracting on land. No more Admiralty-Maritime courts operating outside their strictly limited jurisdiction. No more enfranchisement of living people without their knowledge and consent. No more “child labor” bonds applied to babies. No more unlawful conversion of our military into a private mercenary service. No more billionaires setting up a corporation, calling it “the United States of America”, and impersonating this country and its government. No more gold and silver assets being secretly cashiered offshore in undisclosed “safekeeping”. No more illegal and unlawful press-ganging and conscription of Americans into quasi-military service. No more wars for

profit. No more Monroe Doctrine promoting unauthorized extra-territorial interference in the affairs of other countries. No more taxing Americans "as if" they were legitimately some species of Federal citizenry. No more charging Americans for "Federal Income Taxes" when the vast majority receive no paychecks from Uncle Sam and the remainder receive paychecks that are not subject to an illegal payroll kickback tax. No more "property taxes" foisted off on the actual landowners to pay for unstipulated services provided by monkey corporations pretending to be local governments. No more false claims against American land interests, public or private. No more foreign Executors de Son Tort "representing" us in foreign courts. No more presumption that our actual government is "absent" or "in interregnum". No more foreign ownership claims against the States of the Union formed during and after the American Civil War. No more government mortgages being sloughed off onto "home owners" who are actually intending to be "house owners", not tenants, and not "future lease purchase holders". No more perpetually bankrupt Maritime and Central Bank monopolies. No more private bank scrips posing as legitimate national currencies. No more interest payments on a non-existent National Debt. No more duplicate bureaucracies double and quadruple charging Americans for the same services. No more hokey bookkeeping that never balances the actual debt and credit ledgers. No more criminal patents issued by the US Patent and Trademark Office. No more preferential deep-sixing of new beneficial technologies using the pretense of "National Security" to prevent competition with entrenched industrial interests. No more geoengineering, deployment of DEW weapons, biological warfare, weather engineering, electromagnetic signal experimentation, chemtrails, legalized pollution of the environment and undisclosed "testing" of exotic weapons on the domestic population of this country. No more hiring out our military as mercenaries serving foreign interests. No more foreign military paymasters. No more undisclosed state-of-state franchises of Federal corporations operating "as" State Governments. No more misapplication of statutory laws to non-citizens. No more misapplication of Federal Code and assumptions of regulatory authority over average Americans engaged in activities and occupations unrelated to the Federal Government, its holdings, and its enumerated delegations of powers. No more lack of disclosure concerning the nature and limitations of the "Congresses" that have been convened since 1860. No more extension of legislative functions and authorities to Administrative Agencies and Non-Governmental Organizations (NGO's). No more passing legislation that hasn't been read and intelligently debated. No more abuse of our Title IV war time flag to promote False Flag operations. No more charge-backs for the costs of these commercial mercenary operations misapplied to the states and people of this country and their credit. No more continuance of a pretense of being perpetually "at war" in the jurisdiction of the sea, when the actual government of the people has been returned to Session and has declared that it is at peace and has been at peace since the conclusion of the War of 1812 — and is, appropriately, flying the peacetime flag. No more display of the American Flag in the struck position in and around the Capitol Building enclave in Washington, DC. An end to the ban on teaching American as well as United States History in the public school system. No more use and abuse of American assets of any kind in payola schemes to buy off the cooperation of foreign government officials. No more regime change operations in this country or any other. No more protected liability status or for-profit sector status for Health Care and associated industries. No more Bar Association or American Medical Association licensing imposed on American lawyers and physicians. No more "marriage licenses" used to convert what is meant to be private and sacred into a public joint venture. No continued efforts to substitute a sea-going foreign "republic" for the American Federal Republic we are owed. No more predatory court actions or confiscations of property belonging to Americans. No more courts run on a commission basis. No more fraud, graft, deceit, or bullying of any kind, anywhere, by anybody associated in any way with our lawful government. No more private insurance required on property and activities that are rightfully secured under indemnity bonds. No securitization of living flesh under any condition or any labor bonding scheme whatsoever. No sidebar copyrighting or trademarking of anyone's private name for public or commercial purposes. No "Special Ops" engaging in criminal activities for profit. No gun running. No drug smuggling. No trafficking of people, ever. No trafficking of blood, DNA, or body parts. No claims of ownership based on disclosed or undisclosed injection or other means of including patented scraps of

DNA into the genome of individuals. No claims, public or private, by any government organization or subcontractor against the DNA or intellectual property of any of the people of this country, alive or dead. No conspiratorial efforts to deny constitutional guarantees, safety provisions, or evade service obligations under the various constitutions to anyone born or naturalized in this country or any state thereof. No withholding of exemptions and remedies plainly stated in Federal Code, for example, the Mutual Offset Credit Exemption Exchanges that should have been rolled out, publicized, and made available to the American Public decades ago, and which would have, if properly administered, prevented the accrual of foreign government debt being misapplied against American assets and persons that are owed protection and good faith service under both The Constitution of the United States and The Constitution of the United States of America. In particular, no more evasion of the substantial provisions of Article IV of both service contracts. No more enforced non-disclosure regarding government financial and auditing practices, the keeping of two sets of books to hide income streams, investments, and debts. No more deceitful presentation of budgets as if these budgets encompassed the total of government resources and no more political poor-mouthing based on budget deficits used to justify new taxes. No more misrepresentation of foreign corporation elections as if these were elections of our actual public government officials. No more coercive or undisclosed use of members of the military, National Guard, or any other public safety organization as guinea pigs. Anyone caught imposing upon or denying benefits that are owed to these personnel or any other government employee for failure to consent to experimental test programs of any kind must be arrested and charged with treason against the American Government. Any denial of benefits to veterans or their families based on refusal to receive Covid 19 vaccine or similar “products” must be reversed and full benefits must be restored as if the phony pandemic never occurred. No protection from prosecution for any pharmaceutical or chemical production corporation, research institution, or government partner, subcontractor or employee failing their good faith service commitment.

We’ve all seen more than enough of all the above, and it’s high time the American People found their voices and made it clear to Mr. Trump and those shadowy Principals ranked above him, that none of the foregoing is acceptable. These corrections will require a lot of effort and a substantial amount of time. We realize that these offending practices and the “institutional drift” supporting them has occurred over a period of more than 160 years and will not be corrected overnight.

We authorize DOGE, the newly created Department of Government Efficiency to investigate and provide the analytics supporting all of the above corrective initiatives across all government departments, agency subcontractors, affiliated state-of-state franchise operations, State Trust organizations, and NGO contract recipients.
