

Their Promise to Pay

International Public Notice

October 23, 2025

The United States of America —
Federation of States

Begin with the fact that “they” -meaning the British Territorial United States- Puerto Rico, the Mariana Islands, etc., never had any money to speak of.

What little money these nations had was stolen by the British Government and American Tories who stripped the assets of these island nations like a vulture stripping carion, and then saddled the people with the debts of the same government that helped them into the poor house.

All British Territorial U.S. Citizens and their compatriots throughout the Home Islands and Commonwealth are perpetually broke, because they are responsible for paying the reparations and rebuilding costs of Britain’s wars.

Benjamin Franklin and George Washington were both very aware of how Britain forced the Colonies to fight in the French and Indian War (our name for the Seven Year War) and then also expected us to pay for the privilege of fighting for them and also pay for the cost of their larger European war with Prussia.

Privately, British war-mongering was one of the main reasons that the Founding Fathers split from Britain and the reason that they pursued a relatively non-interventionist and isolationist foreign policy.

They could see how some sectors of society made huge amounts of pure profit on wars, leaving other sectors to pay for the expenses of these wars in blood and later, in money.

So the British Territorial Government, also known as “the United States Government” is a government of perpetual paupers subsisting under the British Crown.

Why would anyone extend any credit to them? Why would anyone believe their promises to pay, given their liability and circumstance?

If you knew it was “the” United States you were talking to, you’d slam the door and never give them a penny, but if they impersonated their employer, The United States, you’d roll out the red carpet. They knew this.

That’s why they impersonated us.

So they impersonated us. Their corporation doing business as “the United States of America” (Incorporated) impersonated our Federal Republic doing business as “the united States of America” and their Scottish corporation doing business as “The United States of America” (Incorporated) impersonated our Federation of States, doing business as The United States of America.

They’ve never had a pot. They’ve always been deeply in debt over their heads. They have never had control of their own assets, including their own credit. They robbed their own employers and misrepresented us to the rest of the world.

What do you think their promise to pay is worth?

This is precisely what is coming home to millions of “Federal” Employees, both Civil Service and Military, who are being asked to continue working without pay based on promises of back pay in the

future when everything gets straightened out.

What everyone needs to understand is that their “National Debt” is our “National Credit”. All that they have ever been able to offer, are promises to pay. The Federal Reserve Notes are promises to pay.

However, we have already paid for them, simply not been credited.

Therein lies the rub. We have never been credited though we have paid their same I.O.U.s over and over and over again.

Ask yourself — how many times does a dollar bill change hands in its lifetime? Realize that every time it changes hands, that bill has extracted actual goods and services equal to its face value and those goods and services are actual, factual goods and services, even if the “debt” presented is long-since paid and has become unreal.

The entire “National Debt” should be cancelled, not passed on as a debt to any Underwriters presumed to exist, and it should be cancelled right now.

Why? Because we have already, demonstrably, in front of God and Everyone, paid it a thousand times over.

Every bit of “interest” accrued on the “National Debt” should also be cancelled for the same reason.

The books have never been balanced. The credit owed to the American People has never been applied against the debt of the Federal Workers and the “United States” government(s).

What is the excuse for that?

All our assets including our credit is owed back to us unharmed.

And they can't pay it, because they never had a pot, and they've only dug themselves deeper and deeper into debt to us this entire time.

What we can do to dig out of this morass of mayhem our Federal Employees have left us, is to expatriate from any presumption that we are British Subjects, and issue Prepaid Credit Certificates and with every Certificate redeemed, reduce the amount of fiat currency in circulation. This can be done by electronic cancellation of “money of account” on a one-to-one basis.

A certificate or coupon for prepaid credit equal to one dollar takes out one Federal Reserve Note “dollar”. Both the prepaid credit and the fiat debt note are destroyed on the computer ledger and in this way, the accounts are gradually balanced as consumers remove debt from the market. Once the debt is gone, they begin adding value back into the currency.

This is what should have been happening ever since 1944, but thanks to both stupidity and greed, and Britain's “Uniform Securitization Scheme” — it hasn't.

Those of you who are watching the ball are asking, but, but, but.... a dollar bill can be transferred hundreds, even thousands of times. We didn't just pay for it once. We provided goods and services every time that bill changed hands! It's not enough to just cancel it and call it even.

What happens is that the gargantuan pile of prepaid credit you are owed remains even after every fiat dollar in existence is cancelled out.

And that's a good thing, because if Federal workers can be paid with I.O.U.S, they can certainly be paid with prepaid credit that they and their forefathers already earned.

The moral of this Notice is that the Federal workers don't know how to solve this conundrum and they don't have authority to solve it, because at the end of the day, the prepaid credit belongs to us, the people of this country.

And here we are, “returned from over the sea”, the people of America and the rest of the world.

It's time for us to take a break from paying dozens of taxes and mortgages we don't owe. It's time to spend down our prepaid credit and put new Trustees and new Fiduciaries in charge so that this kind of thing never happens again.

And yes, it's time to rescue the Federal workers, along with everyone else.

Special Notice to the Trump Administration. If Scott Bessent can't figure this out, send him to Alaska.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.
