

To the International Court of Justice

International Public Notice

August 3, 2025

The United States of America —
Federation of States

Today we have learned that Donald J. Trump presented the Court with a 4,500 page document attempting to justify the adoption of a new currency called the “United States Note” as the world’s Reserve Currency. This would replace the fraudulent Federal Reserve Note, but be no less fraudulent.

Reasons why this cannot be allowed to happen:

1. A world economy based on debt is by definition based on coercion, peonage, and slavery — all of which have been outlawed worldwide since 1926.
2. The victims of this “system” — as in a criminal gimmick — have all been defrauded and denigrated using means of fraud and deceit exercised under color of law, in gross breach of trust and commercial service contract, and also under false pretense of “war”: mischaracterizing an illegal commercial mercenary conflict as a “war” does not dignify it as such.
3. Now that the rest of the world knows the nature of this regime and realizes that the men who have sold our country out have all been secretly adopting the political status of British Territorial U.S. Citizens and are employees and agents of “the United States of America, Incorporated” — a British Crown Corporation, the context of this situation is clear.

Though these men were born and raised here in this country, they are British Crown Mercenaries impersonating Americans — and illegally impersonating American Government Officials by taking advantage of this confusion.

This includes Mr. Trump who is President of this foreign corporation just as Abraham Lincoln was President of it. Mr. Trump has been invited to correct this situation on multiple occasions to no avail. While promising to “Make America Great Again” he has

remained loyal to the British Territorial regime and its agenda:

- (A) Release of the Pandemic horror in honor of Prince Philip’s wishes to become a loathsome virus after his death and do his part to reduce the population.
- (B) Acceptance of “the State of Israel, Inc.” as the 51st State-of-State promoted by the British Territorial “United States” Government.
- (C) Acceptance of the carpet-bombing of Gaza, the genocide of helpless civilians including over 20,000 children.
- (D) Attempts to substitute a British fake “Federal Republic” for the long-dormant American Federal

Republic, and pretend that they are restoring the American Government, instead.

(E) Attempts to create and dominate a new series of worldwide canal structures that will, if allowed, create transfer monopolies of unprecedented scale and literally, physically, control commodity supplies and markets of all kinds in the ultimate obstruction of trade scheme.

(F) These are transnational British Empire-based activities being promoted by British Territorial Mercenaries; despite their public show of ending the Commonwealth and disbanding British Colonial rule, the Perpetrators simply changed the jurisdiction of their operations and doubled-down their efforts to coercively control, rob, and defraud other nations — a process that continues unabated today.

All these evils, plus a “new” debt-based financial system, have been advocated by Donald Trump, and he has obviously done so in lock-step as a British Crown Officer, the President of “the United States of America, Incorporated” —not as an American.

4. Without disclosure to their Employers these infamous Tories have sought to impersonate the American Government as a whole, and have abused their position of trust as service providers under contract to access our credit and purloin our assets for their own unauthorized benefit and use. Being Mercenaries, this has meant that the entire world has been kept at war, or rather, in mercenary conflicts, for the past 300 years.

War is how these fellows make their money, and accepting the USN the Reserve Currency would only mean more of the same Old Schtick using different names and proxies.

Unfortunately, the Chinese commercial currency is similarly beset with corruption and coercion, enslavement, peonage, and other debt-based practices and results.

5. This explains the wild spending and lack of accountability that our country has suffered, and which anyone can directly observe; they were endangering collateral and squandering credit that didn't belong to them or to their King — and all while contractually owing us “good faith service” and taking their pay from our pockets.

The Central Banks went along with it, because these Mercenary Corporations colluded with them and protected their illegal obstruction of trade and commodity rigging activities.

The Mercenary Corporations colluded with the Central Banks because the Central Banks printed Monopoly Money, also known as “Legal Tender” for them, and the sanctimonious banks appeared to legitimize things that can never be legitimized, such as the “securitization” of living flesh using labor bonds and other kinds of performance bonds imposed by means of deceit and fraud, coercion, and deliberate non-disclosure and omissions related to these purported contracts.

6. Observing this and the way it was done via the creation of bogus public trusts and illegal latching upon babies in their cradles, other people in other countries, and especially other Governments realize that these Vermin “representing” us, are perverted, nasty, unaccountable, untrustworthy, dishonorable liars, cheats, murderers, and thieves — and understandably, nobody believes a word they say and nobody wants to do business with them.

And Mr. Trump and Mr. Vance can't understand the reputation that precedes them? The reputation of the British Raj in India, and now, what they have done in The United States, together with their Roman Municipal Government collaborators?

If they, the British Crown Agents, would do this to the kind people who gave them employment and allowed them to remain on our shores and let them keep their commercial interests in this country after the War of Independence — people they have been under contract to serve in good faith the entire time — what kind of bullying and immoral coercion, lies and cheating and violence can anyone else expect?

Most importantly — who wants to do business with them? Even Saudi Arabia, their Best Friend Forever, and long-standing Partner in the Crude Oil Development Scheme, has backed away.

This worldwide abhorrence is the most immediate reason why the idea of a “United States Note” should not be entertained as a new “Reserve Currency”, quite apart from the fact that the Federal Reserve Note was issued under conditions of fraud and is based on defrauding living people, and the “United States Note” would simply defraud the same people using slightly different means.

7. All debt-based financial systems operate as “blood money” systems involving long- outlawed practices such as press-ganging and conscription, taxation on labor, undisclosed or disclosed indentured servitude, enslavement, securitization of living flesh, monetization schemes based on artificial trust collateral, coercive contracting,

legalized deceit, denigration of people to the status of things —corporation franchises, transhumans, “special purpose vehicles”, etc.— and other evils that can only consume the living people and this planet, like a flame consumes a candle wick.

8. The foregoing once understood and observed leaves no doubt that debt-based financial systems — which involve using I.O.U.s that is, “promissory notes” or “notes”, as currency — are already outlawed because the basic practices and results of such systems are already outlawed. Press-ganging, for example, has been outlawed for over

200 years, but has been actively practiced in this country and elsewhere under the aegis of the Funny Money System.

So why is the Court even considering another such monetary system based on debt notes?

We have already experienced and know the Federal Reserve Note for what it is, and the world as a whole has no need to experience the same evils again.

9. But what, the Justices must ask — is the answer to the present dilemma of the world financial system?

A prepaid credit system is lawful, honorable, and justified. It has no known downsides and can work side by side with actual asset-backed money as well as other forms of commercial paper.

The Harmony Prepaid Credit Token (“Coin”) is asset-backed by goods and services already delivered under the Federal Reserve scheme, and it is ready to serve as a valid Reserve Currency in a new, clean separate Bilateral Banking System that our American Government has chartered for exactly this purpose, as well as offering a replacement system that does away with the illegal SWIFT transfer monopoly that has corrupted the banking system and obstructed trade worldwide.

We are back, the real Americans.

A gigantic amount of prepaid credit already exists, and stands in the favor of the living people of this planet. We simply convert debt to prepaid credit and use familiar means to access it. There is no need to “promise” anything; it has all already been delivered.

This debt owed to the living people by the corporations must be honored.

10. Unlike debt-based financial systems, a positive system based on already-existing prepaid credit uplifts mankind and celebrates our diversity; it removes the illegal and unnatural obstructions to trade that have been imposed by the whole Federal Reserve scheme, and the commodity rigging and labor crimes that the debt-based financial system has promoted.
