

What Begins Badly, Ends Worse

International Public Notice

April 9, 2026

The United States of America —
Federation of States

After more than 160 years of bullying and bad behavior on the part of the British Crown Regime, after the purported demise of the colonialist Empire and its evils — only to see it rise again in the Territorial domain — after all this time in which the slow-creep of licensed criminality and Corporate Feudalism marched onward, unrecognized for what it was, a great change is on the horizon.

The change has been delivered by the stupidity and self-interest and arrogance of the Perpetrators themselves — the U.S. (British Territorial) Government has bitten off more than anyone cares to choose, by pursuing an unauthorized sidebar “defense” contract with foreign non-American Government interests: Britain, Israel, and Germany — while pretending that their attack on Iran was justified under the Monroe Doctrine as “defense” of our country, when it is clear that Iran posed no direct threat of any kind to us.

As has been pointed out by our actual Head of State, the Monroe Doctrine was formulated by the “President” of a British Territorial Corporation in receipt of a limited defense services contract and no further authorization from our American Government ever expanded that basic contract for our own defense to include acts of aggression and extra-territorial engagement against other countries.

The States of the Union never approved nor ratified in any fashion any foreign corporation policy known as the Monroe Doctrine.

As has also been pointed out, nothing in our government structure permits a “President” to “declare war” or take offensive action against a foreign government on our behalf absent a full vote of our Congress resulting in a formal declaration of war.

Additionally, the attack on Iran was totally illegal under international law, which puts what-appears-to-be the American Government on the wrong side of the issues.

The problem for us, is that it’s not the American Government doing any of this.

It’s the “U.S. Government — a British Territorial entity operating — at least purportedly — under our service contract known as The Constitution of the United States of America.

And if this foreign entity was actually honoring their service contract, none of this would be happening.

The Constitution of the United States of America provides only for the actual defense of our country

upon being attacked, provides only for extra-territorial engagement following a declaration of war by our Congress, not a President, and allows for the use of our Title IV Flag only when exercising our enumerated delegated powers.

It should be clear to all concerned that the “U.S. Government, Inc.” has gone into business for itself without telling anyone, and that it is operating in fact as a rogue mercenary force, deliberately promoting a conflict with Iran and flying our Title IV Flag as “color”, a false flag and a false claim of authority.

We never delegated the power to them to do any of this in our names.

The Mercenary Conflict designed to tie up oil resources and steal the natural resources of another country is going badly for the perpetrators.

Russia, China, and Iran have now joined forces in support of Iran’s national sovereignty. They have unleashed a combined barrage of 1,000 missiles, and it’s probably only the first such barrage.

This is the **largest military strike** in post-World War II history.

And “the U.S.” is on the wrong side of the issues. The U.S. is actually supporting an agenda attacking national sovereignty and international law. President Trump is actually making remarks to the effect that “if it was up to him” — and who else is it up to at this point? — he’d just walk in and take the Iranian oil resources.

Like a thief or corporate bully forcing a merger.

The window for Trump to withdraw is closing, and we wish to draw the line between our country and his British Territorial corporation.

Our sympathy remains with the living people who are the victims of governments and government service providers run rogue — our people and all the other people worldwide who have suffered as result of criminality in high places.

The best thing that can now happen is for all funds to be cut off and for “the U.S.” to be exposed for what it is — a rogue government service provider — that, and calling our misdirected personnel and equipment home before more lives are lost and more property destroyed.

The popular media outlets are all being gagged, but the loss of life and infrastructure and even precious historical landmarks has to be devastating, and please note — no truly reliable news coverage is leaking out, just shaky spot coverage from places like Tel Aviv provided on back channel sources and occasional photographs.

The program is flying as blind as the state-of-the-art IDF jet fighters that were taken out by superior Iranian GPS-blocking technology:

Iran, as we have said before, has the best mathematics and most advanced physics, because its mathematics is precise and complete. So they just used that superiority to create a technology that disrupts navigation equipment dependent on GPS guidance systems.

We do not believe that this is a “colossal intelligence failure”. We believe it is a deliberate intelligence betrayal — direct backlash against Trump’s Administration for the threats this Administration has posed to entrenched intelligence interests.

There is no doubt that the Trump Administration was misled and baited into this, but ignoring international law and disrespecting Iran’s national sovereignty is not a “mistake”. It’s abject criminality.

Sadly, it’s the people of places like Lebanon and Kuwait and Saudi Arabia seeing their family members killed and their towns destroyed, when all they wanted to was to peaceably sell their own oil resources and get along.

In a just world, the bombs would be falling on the Inner City of London, Rome, and sadly, Washington, DC, and Frankfurt, Germany, and Geneva, Switzerland — the places where the planners and instigators of three centuries-worth of war-for-profit have nested like a scourge of termites silently eating away national sovereignty and human decency.

We take no pleasure in these observations. We accept and admit that we have been docile victims who have funded and provided manpower to these Oppressors unaware. We admit that we were asleep at the wheel, beguiled by the Liars into believing things that were increasingly unbelievable — and that this took place over the course of a century and a half.

Perhaps that is the only and best defense — that these evils took root under the fog of war left behind by the so-called American Civil War, and proceeded so covertly, so gradually, that average Americans never knew that their government had been usurped by European “governmental services providers”.

Let the world take notice: we are not them, and they are not us; they have no contract with us that would allow them to do what they have done throughout this attack on Iran, and they are not exercising any delegated powers of ours — and therefore, have no right to fly our Title IV Flag in gross Dishonor.
