The United States of America – Federation of States

Challenge Accepted

The "US" Incorporated has been challenging the world to find a replacement for the USD

The "US" Incorporated has been challenging the world to find a replacement for the USD (international) and FEDERAL RESERVE NOTE (domestic) currencies which have been used as the quote-unquote "Reserve Currency" of the world.

Briefly, our military forces were unlawfully and illegally converted by fraud into mercenary forces; this happened under the Administration of Abraham Lincoln during the so-called "American Civil War" which turned out to be an illegal and undeclared Mercenary Conflict instead.

Since then, those same illegally, unlawfully and immorally converted military forces have been occupying our country and claiming that our lawful government simply "disappeared" leaving them to act as our caretakers and custodians of our assets.

They don't have a shred of any evidence of this and certainly no contract or valid authority for it, but they have been bulling it through year after year without any notice to the actual American Public at all.

We have had to hear about it from European Whistleblowers like Karen Hudes, and delegates of the American Indian Nations coming back from meetings of the United Nations.

Instead of acting as American Armed Forces, these same characters claiming to have custodial rights have acted under the direction of Great Britain and accepted SERCO, a British Crown Paymaster.

Enough said.

In actual fact, when the American Federal Subcontractor known as "the Federal Republic" ceased operations, the "enumerated powers" we vouchsafed to it returned by operation of law to the Delegator, not as they have claimed to the remaining foreign Federal Subcontractors.

Our unincorporated Federation of States -- meaning the original States of the Union, not the Confederated States of States, did all the delegating of powers and was and is the original Holding Company for the Mutual Powers of the States.

The "US" Incorporated has been challenging the world to find a replacement for the USD

Our agreements and customs and traditions all require that there be both a single international asset backed currency issued in gold and a single domestic asset backed currency issued in silver.

Over time these interlopers, lacking authority to issue these currencies in behalf of our country, have seized upon and run up unauthorized credit based on our assets and used that to transact their business during our purported "absence".

We have met and bested their challenge to find an alternative to USD/FRNs.

We have issued an international gold-asset backed currency, the American Federation Dollar, which is now cleared for trading on an unlimited platform basis to supplement existing gold American Eagles.

We have additionally ordered the release of the uncut Kennedy Dollars that are a silver-backed paper certificate currency, the reissuance of United States Silver Dollar coinage, and the release of American Prepaid Credit Certificates.

All of these are asset-backed.

We do not back or underwrite or approve of Central Bank Digital Currencies, as the mismanagement and dishonesty of the Central Banks has caused a large part of the current problems that the world faces.

Giving them the ability to launch digital currencies that are even more ephemeral and subject to political and practical manipulation than FEDERAL RESERVE NOTES would be the abject height of stupidity and recklessness.

It would inevitably lead to catastrophic destruction of the public trust in government and lead not only to war but widespread rioting, starvation, disease and other evils we can all do without.

Therefore, the actual American Government has instructed the Government of the Philippines as the actual Donors and Depositors of all Trust and Account interests and has instructed the Bank for International Settlements concerning the actual ownership interests and actual Fiduciary responsibilities related to our gold and silver which is underwriting all 63 Central Banks, the World Bank, and the Federal Reserve.

The "US" Incorporated has been challenging the world to find a replacement for the USD

The so-called "American" military has stumbled along as the "US" military and been extremely confused throughout, but the actual fact is that they have been used as cheap mercenaries and they have been misled and misdirected by foreign interests to engage in these criminal activities not only against their own people at home, but at against people in friendly Allied nations throughout the world.

Coming back out of this circumstance requires honoring the credit owed to the living people and taxing the corporations, ceasing the unconscionable and immoral impersonation of living people as "citizens", and creating an entirely new system of coinage, currencies, and credit reserves, plus a new banking system enabled to directly connect with all people worldwide.

Nothing else will do and nothing else is indicated.

For thousands of years, mankind has labored and struggled through untold suffering from wars, slavery, interest, usury, debt credit and economic abuse: evil-nomics!

The actual owners "We the Living People" have established the Bilateral Prosperity System formally known as the Bilateral Banking System for all nations and all people for their immediate relief, health, happiness, and restoration after all this criminal activity by both the banks and the military organizations.
