International Public Notice:

June 20th, 2024

The United States of America – Federation of States

Lexis-Nexis, American Bankers Association, Maritime Banks

We consider foreign (British Territorial and Municipal) business associations of all kinds to be potentially criminal, as these organizations are known to promote monopoly interests, to indulge interlocking trust directorates, and have been known to obstruct both trade and commerce via impositions on their members.

Accordingly, we are bypassing the American Bankers Association and several similar business and corporate umbrella organizations in favor of a Direct Connect Network of Basel IV Complaint Banks, businesses, and individuals.

Physically insolvent Maritime Commercial Banks may continue to function as re-capitalized Merchant Banks if they agree to lawfully convert their operations.

Come to us, all of you who are burdened down with crazy regulations, taxes, and the legal industry. Our charters are twelve pages long, and our Bank Treaty is one page long.

We use carriage accounting and cater to individuals and small unincorporated businesses as well as major Merchant Corporations. We make banking simple again.

Our bank system offers super-secure blockchain technology, unique computer capability and independent satellites and servers competent to serve eight billion people. So your business and your customers' business stands apart from claims of public interest.

Global Family Bank's unique payment platform will open the correct RMA-API directly to bank members and expedite direct connectivity so there is no need to wait, no need to go through months or years of regulatory harassment, and no coercive control leveraged by unseen, unelected, and unauthorized business organizations.

Everyone on this planet needs simple, direct, honest, and private banking services. Our data and the data of our customers is not for sale. Our accountants don't keep two sets of books. If this sounds good to you and you see the need for service and simplicity, then join the Bilateral Banking System, or, as we call it, the Global Prosperity System, today.
