

International Public Notice

April 20th, 2025

The United States of America-Federation of States

International Public Notice: Exiting the Criminal System

Ever wonder why, if the government prints the money, there is any need to tax people? Why not just print up what they need and save the billions of dollars worth of time and money wasted every year on tax records and tax research and tax consultants? To say nothing of all the anxiety imposed on people? Why have taxes at all?

This becomes an even more important question when you realize that the government does in fact just print more money to satiate its needs. This is what causes inflation — the devaluation of the money in your pocket.

So, What is going on here?

If you thought it had anything to do with collecting money to pay for roads and schools and fire hydrants, you'd be wrong.

The Grace Report proved beyond any doubt that the money collected by the Internal Revenue Service/IRS (yes, there are two such "services") doesn't pay for any services or infrastructure at all.

All the money collected by the Internal Revenue Service and IRS go to service the so-called "National Debt", and each year, more debt is added to the Principal, and each year, more is added to the Interest on this debt.

The real world purpose of the Federal Income Tax is to remove money from the economy, specifically, your private sector economy, which is a deflationary action and serves to increase the value of the remaining "dollars".

The Federal Income Tax, then, is the pressure valve of the monetary system --- the tax collection deflates the currency and increases its relative market value, while the government's printing of money is inflationary and decreases the value of the currency. Just imagine the Economy as an Army Mule, with the Federal Income Tax being the left-hand goad and the government printing presses being the right-hand goad, and the President of this operation being the Mule-skinner, geeing and hawing his way down the road.

So now you finally know what the actual use and purpose of the Federal Income Tax is, and why it is necessary. Without its deflationary offset functions, there would only be inflation and a constant, steady, inexorable devaluation of the fiat currency. This is what happens anyway, it just happens more slowly by using the tax to offset the spending.

The death of all fiat monetary systems begins with the moment of their birth. To better understand this, return to Joe's Hamburger Shop.

The Federal Worker appears. It's lunch time. He's hungry. He orders a hamburger, and you, Joe, get busy and fix him one. After he has eaten it with much satisfaction, he gives you a "Federal Reserve Note" --- which is a Promissory Note, otherwise known as an I.O.U. issued by the Federal Reserve Banks.

This peculiar I.O.U. doesn't have a date when it is to be repaid and it doesn't stipulate how or with what commodity or service it will be repaid. It is not a negotiable instrument of any kind and has no value. None at all. We have provided numerous court cases that leave absolutely no doubt about this: if you steal a stack of Federal Reserve Notes, you can't be charged with theft.

So, you've been given a literally worthless I.O.U. in inequitable exchange for a hamburger plus your labor to make that hamburger, and you have accepted this I.O.U. because the presentment was made under color of law as legal tender.

The debt is all on the side of the government worker and the government corporation issuing the "note".

The credit accruing from this transaction is all on your side, Joe.

And here's the kicker -- you thought that it was your government issuing this I.O.U., but it was actually a foreign Municipal corporation doing business as either "UNITED STATES OF AMERICA" or "THE UNITED STATES OF AMERICA" --- Incorporated. After a while those for-profit foreign corporations go bankrupt and leave you, Joe, holding the debt, because you, Joe, are their purported Underwriter.

This is how the government "Service Providers" contrive to make you pay all their bills, and then also pay all their debts, plus interest. And finally soak you a third time to pay off their bankruptcies.

On the private side, you paid for their hamburger with your goods and services up front, then later, on the public side, you paid off their resulting debt to you as a tax that you paid "for" them, and finally, they get in one more lick when they charge off their debts in bankruptcy and leave you standing as their Underwriter.

Seen from this standpoint, the Federal Income Tax is a "forgiveness" of debt that they, the federal corporations and workers--- both Territorial and Municipal -- owe you. It's a "gift" -- extracted under conditions of deceit and violence and color of law. And this is exactly what we find when we dig into it.

The Federal Income Tax is a "gift and estate tax"--- a tax on your gift to them and on your Municipal Estate --- a public trust, which they gratuitously created and now administer "for" you as yet another service you never asked for and never wanted. Wrap your heads around this: you give them the hamburger and your labor to create it, in exchange for an I.O.U. ----and this creates their debt to you.

Yo u have already paid their debt with actual goods and services and this makes you their Creditor.

Next, they charge the debt they owe to you back to you, and collect a tax from you, to pay the debt they owe to you, plus interest.

Think of it in terms of net transactions:

(A) Hamburger worth \$10 given by Joe in exchange for Sam's I.O.U. Net result: (Uncle) Sam owes Joe \$10. Joe is Sam's Creditor.

But....

(B) Uncle Sam, the actual Debtor, writes up a tax bill for \$10, plus interest, and assesses it against Joe. Net result: Joe is being charged another \$10 for the hamburger he already gave to Sam, plus interest.

Yes, Joe, you not only already paid for their hamburger, now you are being hit up to pay the "debt" they accrued for the hamburger, plus interest -- literally a 100% gift tax, plus interest, on your "gift" to them, and all extracted from your "estate" while you are still alive.

The Federal Reserve, the IRS, the whole system, is nothing but a huge constructive fraud scheme designed to drain actual goods and services out of the private economy and make a gross 100% plus interest tax free profit for this "service".

You buy the hamburger and provide the labor to make it.

Then, you get charged a 100% gift tax, plus interest, on this "gift".

So you pay for their hamburger twice. Plus interest.

You pay for it once with actual goods and services.

You pay for it twice as taxation on a debt you don't owe, plus interest.

Each time, you are the actual Creditor, but you are not credited for providing the actual hamburger; it's only when you pay for that hamburger a second time and discharge Uncle Sam's debt to you, that the stinking matter finally gets settled.

The Miscreants responsible sniff and look at you suspiciously as if you were the Debtor and the Guilty Party, when in fact, Uncle Sam has double-dipped and skipped town. This accounting "error" creates the appearance of a debt where none exists and then provides for interest payments on this non-existent debt, which is ultimately owed to you, Joe. All of it is owed to you.

Finally, the foreign corporations responsible for this gross fraud, bad faith, and breach of contract go bankrupt. And they charge this off to you, too, so that you, Joe, the actual Creditor of the whole Shebang, are cast in the role of the Insurer/Underwriter of the privateers who have already robbed you twice.

And you get to pay for it all a third time.

Now you and all the other victims of this outrageous scam are stuck paying for not only all the hamburgers the rats owe you, but also all the armaments and ads and politicians they bought on your dime.

They claim, falsely, that you are the debtor, Joe.

And you just stand there like a rabbit in the headlights.

The IRS and the Internal Revenue Service both need to be shut down, because they are engaged in criminal international privateering and commercial fraud. The Federal Reserve needs to be shut down for the same reason. The Government Accounting Office needs to be reamed out and totally audited and disciplined for never bringing forward the AUTOTRIS accounts and balancing the books. The various Treasury Departments need the same treatment. Every player and administrator and manager involved in this scheme needs to be hauled out of their den, arrested, prosecuted, and sent to prison for a long, long time.

Things have gotten too hot for the knaves and charlatans, so they have scurried around and tried to come up with a new version of the old scheme.

Now, though forced to seek some new business partners, they propose to set up two (2) new monopolies to replace the "Federal Reserve" and the "United States Treasury" — both under British control, to replace the old gig.

Please remind yourselves that every time you see UNITED STATES OF AMERICA (Incorporated) or any other incorporated entity using a name that seems to be American, you are actually looking at a British Crown operation. They are pretending to be us and using our Good Names as storefronts.

It is well known that the British counterpart ran to BRICs and became a member almost immediately. So be aware that they are embedded under their own name (for once) in the BRICs organization and are busy meddling and controlling. BRICs is set up as the new monopoly controlling physical gold and other physical assets.

The so-called Quantum Financial System (QFS) is set up to be the monopoly controlling commercial instruments --- credit and debt notes, stocks, bonds, and securities. China plays a lynchpin part in this scheme.

Britain, India, Brazil, Russia all gang up and counterbalance China in the BRICS organization, while the "US" --- meaning the British Crown Corporation calling itself the UNITED STATES OF AMERICA counterbalances China in the QFS.

So there you have the two new multinational monopolies, BRICS controlling physical assets and QFS controlling commercial assets, and the only real change that this represents is that more hands are in the respective pots.

China is the only one discomfited. The Brits have identified China as the "tipping point" -- and are bent on destroying China's ability to influence what they want to control and influence using their own British entity to control and influence BRICS and their "American" knock-off corporation to control and influence QFS.

If, like us, you don't trust these vicious criminals despite their nice tweed suits, please consider that banking is an occupation of common right and it doesn't have to be this way.

The con artists and war-mongers can be exposed for what they are. The monopolists can be detected and overturned. Most of all, their "enforcement arm", the members of the Bar Associations, can be recognized for their part in creating, enforcing, and profiting from this worldwide criminality and fraud:

https://www.youtube.com/watch?v=q_HpTBEIzRo

We, the actual Americans, have not been idle. Since 2007 we have been developing our own bank system, one built on accountability, simplicity, and though it sounds corny, love.

We, and our bank system, are done with evil.

If you want to profit from "perpetual war" and conflict and mindless greed and duplicity, if you want to run money laundering operations, abuse and torture children, proliferate endless spending on war and death and men whose only goal in life is to figure out more and better ways to kill and control others join BRICs and OFS. Continue to profit these criminals and live in the snake pits these criminals create.

But if you have different values and different goals and don't approve of monopolies and don't want to engage in endless wars for profit and aren't content to let these known criminals continue to rule your world and bully and rob you at will ---- then join our Bilateral Bank System. Vote with your feet. You have freewill.

If you own a bank in the Commercial Maritime Bank system presently being railroaded and controlled by the Brits and their Pals, it's surprisingly easy to lawfully convert your operations into a land-based Commercial Bank and enjoy very substantial benefits, such as freedom from foreign taxation, release from 80 million statutory regulations, and

an end to ever-present threats and blackmail resulting from forced participation in fraud and coercive profiteering.

If you are interested in recouping control of your own physical assets and the assets of your customers, for the benefit of your communities and families, that, too, is do-able, by creating your own international trade bank.

This International Public Notice is addressed to all people everywhere who use banking services, all those who have been impacted by the current banking and currency manipulators, all those who are currently providing banking services, bank and credit union owner/operators, legitimate sovereign governments, everyone who has been cheated, everyone who is tired of all this criminality, mercenary war, and deceit ---- there is an alternative.

Come home. Operate your affairs as living people and unincorporated businesses. Join our Bilateral Bank System. It's easier than you might think to lawfully convert your business interests and begin living in a sane world again.
