

Yet Another Substitution Scheme

International Public Notice

December 29, 2025

The United States of America —
Federation of States

Notice to Principals is Notice to Agents; Notice to Agents is Notice to Principals:

The Perpetrators don't learn any new tricks, and simply continue to refine and embroider their same Old Schtick.

The reason "the Fed" didn't immediately liquidate the bank that failed their margin calls on silver this weekend, as the commodity market rules allow, is that the same bank, JP Morgan, is operating as the "FEDERAL RESERVE".

JP Morgan received the trademark name "FEDERAL RESERVE" as part of the settlement of the 2009 bankruptcy of the "Federal Reserve System". As a result, it can function as "JP Morgan" one minute and as the "FEDERAL RESERVE" the next, with nobody being the wiser.

When it came to the Emergency Fed Window for a loan, it was coming to its own window.

And if it had any trouble giving itself a loan of what ended up being \$51 Billion in taxpayer debt and inflation of the currency, its sister bank, Chase, gained the trademark "FEDERAL RESERVE BOARD OF GOVERNORS" in the same 2009 bankruptcy. LOL.

You see? It's all crooked, all arbitrary, all based on tricky use of names and trademarks to pull off self-interested fraud schemes.

And the same banks that do these things are holding the purse strings of the "Congress" which isn't operating correctly or honestly, either.

This same hopelessly misrepresented and malfunctioning "Congress" holds the purse-strings on the military, and so, around and around it goes.

What does accrue from this weekend's charade is that the silver asset ledger — the actual physical asset ledger — that JP Morgan slash "FEDERAL RESERVE" is holding onto, and it's a doozie — 750 million ounces of pure silver.

A very sizable portion of that silver hoard belongs to us, the American People, and we have tracked the provenance easily enough.

It was purloined by the Federal Reserve System via the 1933 Emergency Banking Act, which provided for the exchange of one Federal Reserve (Promissory) Note for one United States Silver Dollar — a paper I.O.U. from the Federal Reserve System in inequitable exchange for an ounce of silver.

We are supposed to be paid back "someday", but in almost a hundred years, someday has never come.

How about today? Seems like a good day to us.

We hereby claim and agree to receive back the portion of silver that JP Morgan/FEDERAL RESERVE has been holding “for” us; we understand that the old Federal Reserve System had it secured in a trust account that transferred to JP Morgan, off-ledger, of course, during our long and purely purported “absence”.

We have reassigned the American silver assets purloined by the Federal Reserve System and now held by JP Morgan dba FEDERAL RESERVE, to The Global Family International Trade Bank that has been chartered by The United States of America (Unincorporated) since 2021 and hereby direct the U.S. Treasury to produce the mint records and current circulation records of the United States Silver Dollar to produce an estimated settlement amount. This International Public Notice creates an immediate Notice of Lien and non-UCC Lien and Common Law Due Process effective today, December 29th 2025.

By bringing forward the actual asset ledger, JP Morgan has done two irrevocable and irreconcilable things: (1) it has attempted to corner the world market on silver to the profound disadvantage of other banks and the tech companies that are now also facing the loss of their silver supplies from China; (2) it has broken the bank pact of silence surrounding the existence of the physical asset ledgers that have been held off-ledger for decades.

The world now has “cause to know” that there is more to the picture than the banks and the commercial and municipal corporations acting as governments have shown. Much more.

As the lawful governments of the Earth reconvene and the military and police organizations come to terms with their actual obligations and allegiances, we must all bring appropriate pressure to bear on the specific corporations and corporate officials responsible for the criminal malfeasance and misadministration that this country and its people have suffered, along with many other nations worldwide.

In the days to come, we expect that the Trump Administration will offer “heirs” of the fraudulently constructed British Merchant Mariner Estates a veiled settlement offer amounting to a FedNow account and considerably less than pennies on the dollar. Such an assumed accommodation would allow the Perpetrators to keep all the underlying American assets, a grossly disproportionate share of the estate assets, and continue to abuse the Americans as British Subjects under Territorial law, all without any actual disclosure.

We object to this and require Mr. Trump and his Administration as our contractually bound Employees to Cease and Desist these False Claims and undisclosed contracting processes aimed at defrauding and denigrating their Employers, while appearing to provide some means of remedy and redress. The inequitable and undisclosed nature of this proposal, its nature as “bait under duress offer” made to people suffering deliberately induced hyperinflation, all renders it an unlawful and illegal and unacceptable and unaccepted scheme; it is also only made possible by prior illegal acts against the same victims and their ancestors, a taint which must necessarily attach to the QFS “system” and FedNow accounts in question.

We have brought these illegal and unlawful acts before the High Courts in all the appropriate jurisdictions. We have done all that we can reasonably do to enforce the actual Law and bring a halt to these continued organized acts of fraud against the interests of the living people and the actual national governments. It is now the duty of the guilty corporations to correct their operations, provide the

requisite disclosures, and for everyone involved to act in honor.

The difference between a corporation and an armed band of thugs acting at the behest of Robber Barons is very slight — a matter of paperwork backed up by the responsibility of sovereign governments, most especially, the responsibility of the Pope under Ecclesiastical Law.

The current chaos in Britain is emblematic of the whirlwind that gross unaccountability and government-by-incorporated entities operating in the jurisdictions of the air and sea has sown. Europe itself stands in danger of both moral and economic collapse as a result of being literally misled by incorporated entities functioning as — and in place of — national governments. These commercial and municipal corporations long ago gave up any notion of serving the Public in good faith, and went into business for themselves.

We must deal with that fact.

As an ailing and aging King Charles roars back onto the stage of history trying to correct the situation that his own predecessors created, we can only wish him well. He is doing what he can to save the Monarchy — a selfish mission to be sure, but at the same time, he unavoidably saves the people and the sovereignty of England, Ireland, Scotland, and Wales.

Perhaps, on the back side of it, Charles III or someone in the role of British Monarch will have the integrity to put an end to the Raj and the illegal, unlawful, immoral crimes of personage and barratry that have unjustly enriched “the elite” and unjustly impoverished and enslaved millions of trusting innocent people whose social contracts were evaded and rewritten without their knowledge or consent.

Notice to Principals is Notice to Agents; Notice to Agents is Notice to Principals.
